DESIGN CATALOGUE

Handmade in Spain

Arturo Álvarez has been designing and manufacturing decorative lighting for over 20 years. The natural surroundings where our factory is based is a constant source of inspiration, reflected in the forms, textures and materials of the designs. The pursuit of human well-being through the hedonistic enjoyment of the object underlies behind his work.

Handmade design lamps, created taking care of every detail, converting them into unique objects, made under the premise of offering exclusive products with a high emotional content, full of personality. All of this, without overlooking the research and development of new materials, bearing in mind our concern to introduce technologies that contribute to energy saving and a sustainable production.

Arturo Álvarez lleva más de 20 años diseñando y fabricando iluminación decorativa. El enclave natural donde se encuentra nuestra fábrica es una fuente de inspiración continua reflejada en las formas, texturas y materiales de las luminarias. Detrás de su trabajo está la búsqueda del bienestar del ser humano ligado al disfrute hedonista del objeto.

Lámparas de diseño hechas a mano, prestando atención a los detalles, convirtiendo cada una de ellas en un objeto único, bajo la premisa de ofrecer productos exclusivos con un alto componente emocional, llenos de personalidad. Todo ello, sin dejar de lado la exploración y el desarrollo de nuevos materiales, sin perder de vista la preocupación por implementar tecnologías que contribuyan al ahorro energético y a una producción sostenible.

Our atelier is located in the countryside, on the northwest of Spain, near Santiago de Compostela

# Ura

Ura is handcrafted through delicate folds that originate four recognizable shapes from nature. They can be combined freely, and together they create a harmonious game of volumes that shrink and expand, while individually they convey a subtle lightness. The collection is made of painted stainless steel mesh.

Ura está trabajada a mano mediante delicados dobleces, de los que surgen cuatro formas reconocibles en la naturaleza. Combinables entre sí, juntas crean un juego armónico de volúmenes que se contraen y se expanden y en solitario respiran una sutil ligereza. La colección está realizada en malla de acero inoxidable pintada.

# Onn

Onn is a collection of pendant and ceiling lamps made out of painted stainless steel mesh. They evoke the sea world: shells, seaweed, and corals emerge with great force, full of dynamism and vitality. Ideal for walls and ceilings, they allow for interesting compositions through their unusual shapes.

Onn es una colección de lámparas colgantes y plafones realizados en malla de acero inoxidable pintada. Evocan el mundo marino; conchas, algas, corales surgen con fuerza llenos de dinamismo y vitalidad. Ideales para paredes y techos permiten generar interesantes composiciones a través de sus inusuales formas.

## Pili

Pili, a single painted stainless steel thread is interwoven, creating random volumes and a harmonious wrapping irregularity, full of charm and mystery, through which the whimsical light escapes. It is available in two sizes, which allows for visually stunning compositions when several units are combined.

Un único hilo de acero inoxidable pintado se entrelaza creando volúmenes aleatorios sin orden, entretejiendo una irregularidad armónica y envolvente llena de encanto y misterio, por la que escapa caprichosa la luz. Se presenta en dos tamaños, permitiendo generar composiciones, de gran impacto visual, con la combinación de varias unidades.

## Blum

The pieces express a subtle, ethereal and transparent beauty, created from such a cold material as steel. The creator Arturo Álvarez reflects, once more, about the many possible interpretations of objects. Maybe not everything is what it seems.

Las piezas expresan una belleza sutil, etérea y transparente creada a partir de un material frío como es el acero. El creador Arturo Álvarez vuelve a reflexionar sobre las muchas interpretaciones posibles de los objetos. Quizás no todo es lo que parece.

# Tempo

Tempo is a pendant lamp collection made with painted stainless steel mesh. This material, crafted in fine pleats, gives form to two overlapped layers that create two models of lamps full of dynamism. Two liveliness shapes that delicately shine light through each pore. Two forms that part of one. *Andante* and *Vivace*, the representation of two instants generated by the same movement at a different *tempo*.

Tempo es una colección de lámparas colgantes realizadas en malla de acero inoxidable pintada. La malla, trabajada en finos pliegues, da forma a dos capas que se superponen creando dos modelos de luminarias llenas de dinamismo. Dos formas vivas que irradian luz por sus poros con delicadeza. Dos formas que parten de una. *Andante* y *Vivace*, la representación de dos instantes generados por un mismo movimiento con diferente *tempo*.

## Luisa

A series of overlapped layers produces a brightness that softly leaks and filters through them, creating a magical and enveloping atmosphere. The painted stainless steel mesh, crafted in a smooth way, provides a subtle and elegant texture.

Capas superpuestas crean distintas luminosidades que se escapan y se filtran formando un ambiente mágico y envolvente. La malla de acero inoxidable pintada, trabajada en liso, consigue una textura sutil y elegante.

## Ballet

Its shapes are formed by the superposition or gathering of its vertexes, allowing freedom for the own flexibility of the material. The resulting volumes are fluid and natural. Its asymmetry makes its forms change depending on the point of view. *Plié, Relevé, Elancé...* a constant dance of light and shadows.

Las formas son creadas a partir de la superposición o uniones de sus vértices, dejando libertad a la propia naturaleza flexible del material. El resultado son volúmenes fluidos y naturales. Su asimetría hace que sus formas cambien dependiendo del punto de vista. *Plié, Relevé, Elancé...* un baile constante de luz y sombras.

## Nevo

A vibrant shape that seems in constant change.  
A cloud of suggestive curves, of impossible volumes  
in which future and past interweave in a subtle way.  
A self-confident shape made of the latest materials.

Una forma viva que parece en constante evolución.  
Una nube de curvas sugerentes, de volúmenes  
imposibles en la que el futuro se entrelaza con el  
presente de forma sutil. Una forma desacomplejada  
trabajada con materiales de última generación.

## Aros

Strips of polypropylene are moulded in different ways to obtain shapes with volume and grace, producing fresh and light designs that nuance the brightness in a warm way. Celestial bodies that spin around, again and again, and ourselves with them, in an eternal, timeless dance full of harmony. The capricious light escapes between the gaps.

Tiras de polipropileno se trabajan de distintas maneras para lograr formas con volumen y gracia, aportando unos diseños muy frescos y ligeros que tamizan la luz de forma cálida. Los cuerpos celestes girando una y otra vez y nosotros con ellos, en una danza sin fin, sin tiempo, llena de armonía. La luz, caprichosa, se escapa por los espacios abiertos.

## V

A shape from out of space, but yet close and possible, that thrills and inspires us and with who we identify through the extraordinary and fantastic. With the help of plastic injection technology we developed a lighting collection which, through its ribs combined with the geometrical form, immerses us in a world of dreams.

Una forma espacial, pero cercana y posible, que nos emociona y con la que nos identificamos, a través de lo extraordinario y fantástico. A través de la tecnología de inyección de plástico se consigue una familia de luminarias que a través de sus lamas, combinadas de forma geométrica, nos sumergen en un mundo onírico.

## Arturo Álvarez

Arturo Álvarez is an established recognized creator both inside and outside of Spain, by his conceptual contributions to the world of design lighting. He was born in Pontevedra, Spain, in 1964. From the beginning he develops an own style with strong personality. He handles shapes, volumes and light sources fluently in a simple and elegant way, masterfully mixing them and bringing a new vision of creative lighting, coming to conceive in the spaces surprising scenographic and light staging. Currently he continues to explore different lines of work and expression.

In the early nineties he gets interested in the flat glass and learns the techniques of stained glass and tiffany for making lamps. He starts creating luminaries, from ancient techniques, but with a language of its time, contemporary, with Art deco and Art nouveau touches. Over the years he walks and identifies with the Bauhaus concepts of joining and reviewing shapes, volumes, prospects and plans to a careful craftwork.

There are three defined times in the career of Arturo Alvarez. In the early years he explores and works with figurative concepts based on nature. In a second time he progresses toward abstraction exploring simple geometric shapes without abandoning references to nature, it appears the female body, a theme that is repeated and which he keeps on researching along the years.

The recognition for more than 20 years of career path came with two consecutive "Good Design" awards, the first one in 2008 for Gea and the next, in 2009 for Fluo, convened by The Chicago Athenaeum: Museum of Architecture and Design. In 2013, in Las Vegas, he also achieved an HD Product Design Competition Award in the lighting category.

In the last ten years he has been conducting a comprehensive experimental and research work to develop his own materials that allow him a more creative freedom and expressiveness. He takes them out of their common uses, mixing them and transforming them into something new and unique. He creates and patents SIMETECH®, a translucent material which can be molded to obtain different textures.

Arturo Álvarez is currently developing new forms of expression, going deeper into the world of art, exhibiting all around the world his artworks, which use the light as the guiding thread and the human being as the protagonist.

Arturo Álvarez es un consolidado creador reconocido tanto dentro como fuera de España, por sus aportaciones conceptuales al mundo de la iluminación de diseño. Nace en la provincia de Pontevedra, España, en el año 1964. Desarrolla desde el principio un estilo propio y reconocible, de fuerte personalidad. Maneja con soltura formas, volúmenes y fuentes de luz de una forma sencilla y elegante, mezclándolos con maestría y aportando una nueva visión de la iluminación creativa, llegando a concebir en los espacios montajes lumínicos y escenográficos sorprendentes. Actualmente sigue explorando distintas líneas de trabajo y expresión.

A principios de los años noventa se interesa por el vidrio plano y aprende las técnicas del vitreaux y tiffany para la elaboración de lámparas. Comienza a crear luminarias, a partir de técnicas antiguas, pero con un lenguaje de su tiempo, contemporáneo, al principio con guiños al Art deco y Art nouveau. Con los años camina y se identifica con los conceptos de la Bauhaus uniendo y revisando formas, volúmenes, perspectivas y planos a un trabajo artesanal y cuidado.

En la trayectoria de Arturo Álvarez hay tres momentos definidos. Los primeros años explora y trabaja con conceptos figurativos, basados en la naturaleza. En una segunda época avanza hacia la abstracción explorando formas geométricas simples, sin abandonar a su vez las referencias a la naturaleza, aparece el cuerpo de la mujer, una temática que se repite y en la que sigue indagando a lo largo de los años.

Los reconocimientos a más de veinte años de carrera llegan con dos premios consecutivos "Good Design", en 2008 por el diseño de Gea y en el 2009 por Fluo, concedidos por The Chicago Athenaeum: Museum of Architecture and Design. En 2013, en Las Vegas, le otorgan el HD Product Design Competition Award en la categoría Iluminación.

En los últimos diez años viene realizando una labor exhaustiva de experimentación e investigación desarrollando sus propios materiales que le permitan mayor libertad creativa y expresividad. Los descontextualiza de sus usos habituales, los mezcla y los transforma creando algo nuevo y único. Crea y patenta SIMETECH®, un material translúcido, que puede ser moldeable para generar grandes volúmenes.

En la actualidad Arturo Álvarez está desarrollando nuevas formas de expresión, adentrándose en el mundo del arte y exponiendo por todo el mundo sus obras que tienen la luz como hilo conductor y al ser humano como protagonista.

## CONTRACT

We customize and adapt all the designs of our catalogue and develop special models to offer a personal touch, different and unique to every project.

We modify sizes and finishes to meet the esthetic and technical requirements.

Personalizamos y adaptamos los diseños de catálogo y realizamos modelos especiales para ofrecer un toque personal diferenciado y único a cada uno de los proyectos.

Modificamos medidas y acabados según los requerimientos técnicos y estéticos de cada obra.

## MATERIALS

**arturo alvarez** has developed, for some years now, a profound and extensive work in research on new materials. Exploring the possibilities of quotidian elements, taking them out of context to give them new purposes. A new look on the stainless steel mesh and thread, cellulose, glass, plywood and polypropylene strips. From this work arises a universe of designs of a subtle elegance and delicacy, full of movement, through which an intense and scintillating luminosity escapes.

This research has lead him to create his own materials, allowing him new ways of expression. SIMETECH®, the innovate material created by arturo alvarez, was awarded in New York with a BEST OF YEAR 2014 of Interior Design Magazine in the category of "Innovative Translucent Shading / Lighting Solution".

**arturo alvarez** lleva años desarrollando un trabajo profundo y extenso en investigación sobre nuevos materiales. Explora las posibilidades de elementos cotidianos descontextualizándolos y otorgándoles nuevos usos. Una nueva mirada sobre la malla y el hilo de acero inoxidable, la celulosa, el vidrio, el tablero marino y las tiras de polipropileno, de la que surge un universo de diseños delicados y sutiles, grandes volúmenes llenos de movimiento, por los que se escapa una luminosidad intensa y destellante.

Esta investigación le lleva también a crear materiales propios, que le permiten nuevas formas de expresión. SIMETECH®, un innovador material creado por arturo alvarez ha sido reconocido en New York, con un premio BEST OF YEAR 2014 organizado por el magazine Interior Design en la categoría de "Material Innovador Translúcido para Iluminación".

Painted stainless steel mesh. Nevo collection detail.

## Painted stainless steel mesh

### Malla de acero inoxidable pintada

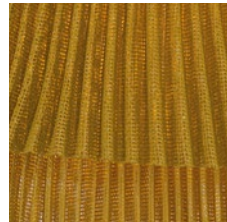

Arturo Álvarez takes materials out of their usual context, exploring their possibilities up to the point of achieving surprising results. He begins with an apparently cold steel mesh, that he folds and curves forming organic elements. He transforms it with these crafting techniques in warm and pleasant forms... bringing it to life. A whole universe of designs develop from this way of working. They all radiate a subtle elegance and delicacy, full of movement, and shine an intense light through them. Painted stainless steel is a compact and resistant material, that won't wear out as time goes by.

Arturo Álvarez descontextualiza el uso habitual de un material, explorando sus posibilidades hasta conseguir un resultado sorprendente. Partiendo de malla acero, aparentemente fríos, juega con él creando pliegues, curvándolo, componiendo elementos orgánicos y convirtiéndolo, con estas técnicas hechas a mano, en formas cálidas, amables... vivas. De este trabajo surge un universo de diseños, de una sutil elegancia y delicadeza, llenos de movimiento, por los que se escapa una luminosidad intensa. El acero inoxidable pintado es un material resistente y compacto, que no se deteriora con el paso del tiempo.

Mantenimiento sencillo. Fácil de limpiar con un plumero o con una pistola de aire comprimido

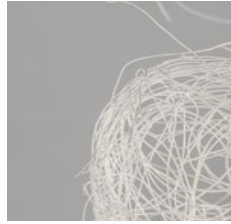

## Painted stainless steel hread

### Hilo de acero inoxidable pintado

Stainless steel, seen from a new perspective. Converted into a tangled, interwoven strand, creating light, random volumes. Seemingly fragile but actually robust, thanks to the resistant paint coating. The result is a series of large, ethereal pieces, which express a subtle, transparent beauty. Objects that are irregular, but still harmonious. Striking. Full of air and light.

Una nueva mirada sobre el acero inoxidable. Convertido en hilo entrelazado y embrollado sobre sí mismo, creando grandes volúmenes aleatorios, ligeros. Aparentemente frágiles, pero resistentes gracias a la dureza que le aporta la pintura. El resultado, unas piezas etéreas, que expresan una belleza sutil y transparente. Objetos irregulares y a la vez armónicos. Impactantes. Llenos de aire y luz.

## SIMETECH® by arturo alvarez

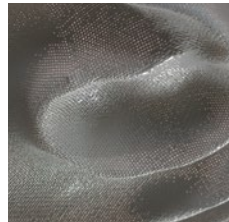

In April 2014, arturo alvarez patented SIMETECH®, a handmade material, composed by a stainless steel mesh with a silicone covering application. The diverse possibilities this stainless steel mesh allows with its silicone covering converts SIMETECH® in a highly malleable and moldable material, suitable for creating large volumes, with different textures and light capacity, adapting itself to the design and identity of every lamp. This material creates zones of chiaroscuro providing a warm and hypnotic light that floods the room causing nice and welcoming atmospheres, full of personality.

En abril del 2014 arturo alvarez patenta SIMETECH®, un material hecho a mano compuesto de una malla metálica de acero inoxidable a la que se le aplica un recubrimiento de silicona. SIMETECH® es un material altamente maleable y moldeable, apto para crear grandes volúmenes, con diferentes texturas y diferentes intensidades lumínicas, adaptándose así al diseño e identidad de cada lámpara. Este material crea zonas de claroscuros aportando una luz cálida e hipnótica que salpica las estancias creando ambientes amables y acogedores llenos de personalidad.

## Cord Cordon

It is a pressed recycled cellulose cord, moulded by techniques developed at the factory. It allows large volume structures, with a light and graceful appearance. Its pleasant touch and the wide range of colors it is made in, from intense ones to more natural tones, is very inspiring to create lamps full of life and movement.

Se trata de un cordón de celulosa prensada reciclada, que se moldea mediante técnicas desarrolladas en la propia fábrica. Esto permite generar estructuras de gran volumen, con una apariencia muy grácil y ligera. Su agradable textura y amplia gama de colores, que va de tonos con carácter a otros más naturales, resulta de gran inspiración a la hora de crear lámparas llenas de vida y movimiento.

Se recomienda no mojar

## Glass Vidrio

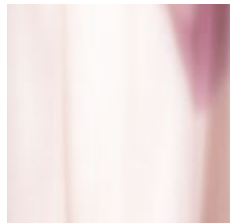

A semi-handcrafted glass from the USA was the chosen one. Its irregularities, eye catching watermarks, felt by touch, give the lamps personality, reinforcing their unique character. It is opalescent glass, in a range of vibrant colors, used in different combinations, going from sobriety to a multicolored symphony. The glass is worked with several techniques, assembled with metal, in a particular revision of the tiffany technique, or in small sequenced pieces that form sinuous and elegant waves.

Se ha seleccionado un vidrio de producción semiartesanal procedente de USA. Las irregularidades que presenta, en forma de aguas, sensibles al tacto y a la vista, dotan a las lámparas de personalidad, reforzando su carácter único. Son vidrios opalescentes, con una gama amplia de colores brillantes, usados en distintas combinaciones que van de la sobriedad a una sinfonía multicolor. Se emplean en diversas técnicas, con ensamblajes de estaño, en una revisión particular de la técnica tiffany, o en pequeñas piezas secuenciadas que forman sinuosas y elegantes ondulaciones.

## Pressed cellulose Celulosa prensada

Versatile and highly moldable materials are chosen for decorative lamp production, especially those which maintain their features of resistance and durability. This is the case of pressed cellulose, which is still made with ancestral techniques and suitably refined becomes a flexible material, ideal to generate compact but stylized structures.

En la fabricación de lámparas decorativas se trabajan materiales versátiles, altamente moldeables, pero que mantienen sus cualidades de durabilidad y resistencia. Este es el caso de la celulosa prensada, que se sigue produciendo a través de técnicas ancestrales. Un refinado adecuado la convierte en un material flexible, idóneo para generar estructuras compactas, aunque estilizadas.

## Plywood Tablero marino

At arturo alvarez's plywood is used in an original way, outstanding its hidden beauty, showing the interior face of the board instead of its surface. The light provided from the lamp comes from the spaces between the perfectly placed strips of plywood, as if they were domino pieces. Its own laminated finish produces the tone of the light, and it is available in white, yellow and black. Plywood, used this way, generates warm pieces, with elegant and clean lines, a searched simpleness that reveals from the inside and that contrasts with the usual toughness of wood, but preserves its resistance.

En arturo alvarez se emplea el tablero de una forma original, poniendo en valor lo oculto, mostrando la belleza de la cara interna en lugar de su superficie. La luz obtenida de las lámparas proviene de los espacios que resultan de colocar ordenadamente los listones de tablero, como si de piezas de dominó se tratase. El propio acabado del laminado proporciona la tonalidad de la luz, y está disponible en blanco, amarillo o wengue. El tablero marino usado de esta forma genera piezas cálidas, con líneas elegantes y limpias, una sencillez buscada que se revela desde el interior y que contrasta con la habitual robustez de la madera, aunque mantenga intacta su resistencia.

## Polypropylene strips Tiras de Polipropileno

It is a material that permits infinite possibilities for design as it's highly flexible. It is used mainly in strips, woven among themselves, recalling the antique techniques of traditional basketmaking. Its lightness is another of its virtues, and large volume lamps, with a lot of presence but very light looking, can be made with it. The designs in polypropylene are commercialized in white and black, colors that provide a touch of elegance to the lamps with more body and appearance of arturo alvarez.

Es un material que permite infinidad de posibilidades en diseño gracias a su alta flexibilidad. Se usa principalmente en forma de tiras, tejiéndolas entre sí, evocando las antiguas técnicas de cestería tradicional. La ligereza es otra de sus cualidades y con él se consiguen lámparas de gran presencia y volumen, que resultan livianas incluso a la vista. Los diseños con polipropileno se comercializan en blanco y en negro, colores que aportan un toque de elegancia a las iluminarias con más cuerpo y presencia de arturo alvarez.

The device is not suitable for generally inflammable surfaces  
Aparato no adaptado para la instalación en superficies normalmente inflamables

Luminaire to use with tungsten halogen bulbs with self protection shield  
Luminaria diseñada para usar lámparas halógenas de wolframio con pantalla de protección propia

With ground devices  
Con toma de tierra

The products in this catalogue are printed photographic reproductions. The color of the pictures may slightly differ from the real color.

All our lamps are totally handmade in Spain. The differences you may find in our luminaires or the range of materials we use, make them unique. Small differences between lamps of the same reference are not defects, they add value to them, because each one is a unique object. The indicated lampshade dimensions are only approximate, never exact.

While maintaining the basic characteristics of the product, arturo alvarez reserves the right to make any modifications at any time with the sole aim of improvement.

Electronic components are guaranteed according to the national applicable regulations [e.g., 2 years in Spain].

US / Imperial measurements in approximate inches.

Los productos de este catálogo son reproducciones fotográficas impresas. Es posible que el color de las imágenes varíe ligeramente con respecto al color real.

Todas nuestras luminarias están hechas íntegramente a mano en España. Las diferencias entre ellas y en los distintos materiales empleados convierten a cada lámpara en única. Pequeñas diferencias entre lámparas de una misma referencia no son un defecto, sino un valor, cada una es un objeto único. Las dimensiones de las tulipas indicadas son sólo aproximadas y nunca exactas.

Manteniendo las características básicas de los diseños, arturo alvarez se reserva el derecho a realizar las modificaciones que considere oportunas con el fin de mejorarlos.

Los componentes electrónicos ofrecen una garantía conforme a la legislación nacional aplicable [ej., 2 años en España].

Las medidas en pulgadas son aproximadas.
