B.lux

The essence of our land and its traditions

We work from an enclave located in the heart of nature, where we combine innovation and tradition with an offer that fuses technology with the best artwork.

We are deeply rooted in our environment. We are heirs to the traditional values of our land and to the best of its industrial character, such as commitment and satisfaction in the face of a job well done.

B.lux

Commitment to what is natural

Our environment has given us everything and, to preserve this tremendous asset, we comply with the highest standards of production control and waste management. Ninety per cent of the raw materials we use are of Spanish origin and we use wood from controlled forests that meet the sustainability criteria established by the PEFC.

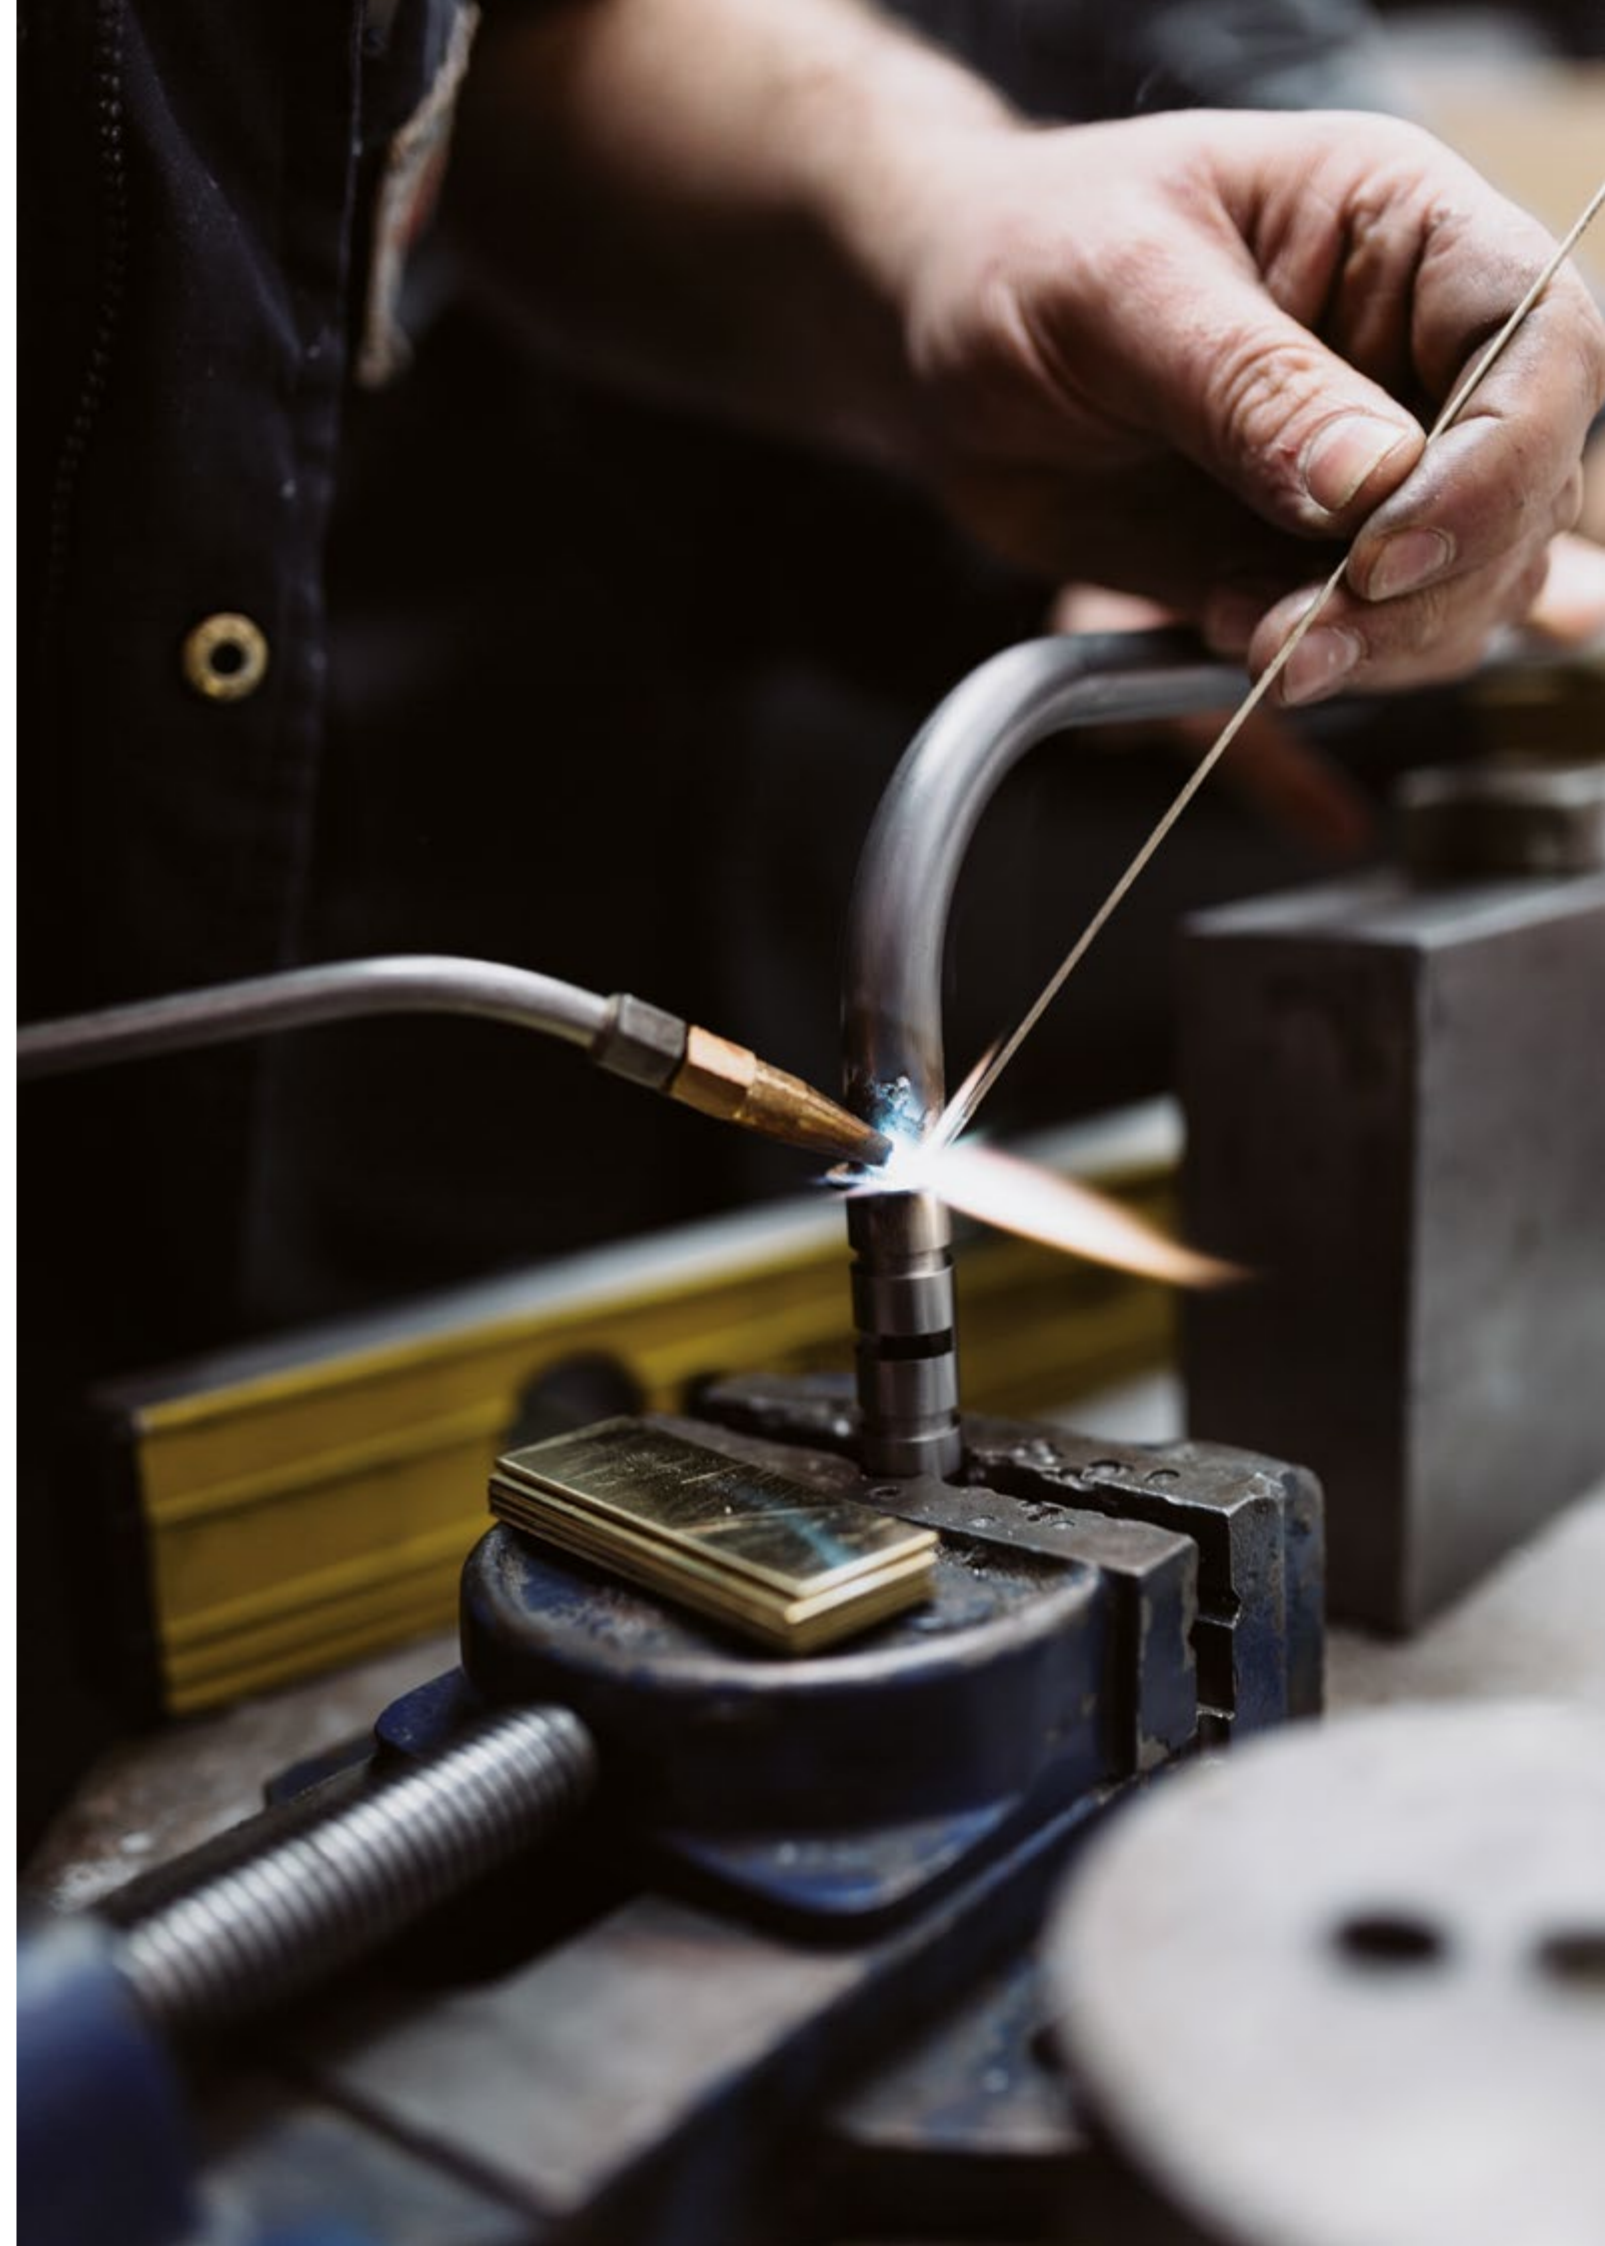

This is just a small example of the many measures that we have taken to raise B.lux to the level of an industry with a present and future committed to nature.

B.lux

Control, trust and effort

Our products are distributed in 65 countries on five continents. This outstanding international presence is possible thanks to the rigorous control of the manufacturing and distribution processes to which we subject our luminaires, allowing them to meet and exceed the most demanding quality standards.

We are committed to long-lasting relationships based on trust between manufacturer and customer. Our success is based on a slow growth, sustained over time, which advances with secure steps. There are no secrets – this is the natural result of our team's dedication and talent focused on offering the best service.
