Brand van Egmond

Every year we at BRAND VAN EGMOND strive to use all our knowledge and experience in order to create some of the most astounding lighting sculptures.

We are constantly inspired by the world around us, the people we meet and the beautiful projects we are invited to be part of. In return, we are frequently asked to translate unique lighting wishes into handcrafted reality. Partners like Louis Vuitton, Chopard and the Four Seasons Hotels invited BRAND VAN EGMOND to create tailor-made lighting solutions for their spaces. We welcome everybody who wants to see our designs, or would like personal advice from William Brand and his team, to our office and ateliers in Naarden, The Netherlands.

Linea

Design by William Brand

Truthful and pure, the Linea makes a precise yet playful statement through thin lines of beauty.

Floating through the sky, as if a magical formula brought to a standstill the whirlwind of steel, fire and light.

Frozen, both in time as well as in space.

Just like airplanes can leave a composition of line-shaped clouds -the passing proof of human movement in the air- the Linea is like a drawing of illuminating lines in the sky. Temporarily mid-air, permanently illuminating.

Creating a beautiful light is like good architecture: a matter of proportions.

Galaxy

Design by William Brand

The Galaxy is a constellation of energy, movement and form. Propelling away from the centre of gravity towards clouds of stardust and outer planets.

Avant-Garde by nature, the shapes and forms of the Galaxy relate to each other as the planets towards the sun. The artist and the dreamer both know, space is where an image grows.

The new collection Galaxy fell into the 21st century without a trace of regret from a different era, lightyears away. A lasting design has to have roots.

Louise

Design by William Brand

With almost carefree delight, William designed this Louise collection: A simple frame, decorated in a pleasing rhythm with glass lanterns.

A hint of chaos, never far away in designs from William Brand, is present: the different colours and positions of the glass lanterns have a joyful effect.

The frame is available in nickel aged, brass grinded, black matt, copper burnished and the lanterns in 4 different types of glass: bronze, clear satin, grey and iridescent.

Orpheus

Design by William Brand

One of the most legendary poets and singers in Greek mythology is Orpheus. He sang so beautifully that he touched everyone and all around him. The King and Queen were moved to tears, but also the birds, trees and even the stones were hypnotized by his magical voice.

We have found several objects of desire amidst the nymphs and trees, and formed them into new lights. A semi-precious stone, a golden mineral and a delicate rose: all captured in a protective embrace of casted bronze.

Orpheus-Amethyst

This semi-precious stone, embraced through the millennia by ancient Greeks, Russian Tsars and English bishops is seen as a protector against dark magic, and a symbol for those in love.

Orpheus-Pyrite

An astonishing mineral, seemingly made by human hands but in fact found in nature, is called Pyrite.

Given its strong resemblance to gold, it was nicknamed by gold diggers as 'fool's gold'. The surfaces reflect the light in a fabulous way; creating a splendour of golden light.

Fractal

Design by William Brand

Our brains are set up to bring order in chaos, find logic in confusion and recognise patterns in the opaque. However, what to make of the puzzle of the exact yet endless repetition found at times around us?

Fractal is a natural phenomenon as well as a mathematical set that exhibits a repeating pattern.

The organised chaos of the reflecting elements of the Fractal dispenses the light beautifully in all directions.

The finishes are in stainless steel, brass grinded, black matt and white matt.

Edison's Tail

Design by William Brand

Unadorned yet full of energy, contemporary and elegant: Edison's Tail moves freely through space and reveals that bringing light and vitality can go hand in hand.

Introduced successfully by the inventor Thomas Edison, the light bulb is - more than in any other collection - an integral part of the overall design. The spirited and energetic shape of Edison's Tail is evocative of the initial burst of life when a seed opens and through the cracks the first green shoots appear.

To see this exact moment, is to see a wonder in the making. To capture this moment, is what Edison's Tail attempts.

Shiro

Design by William Brand

By means of the deduction of every unnecessary layer of decoration, a calmness of mind appears allowing for a new collection to be born. The Shiro – Japanese for castle - is the result of a journey of deconstruction.

Stripped of all but the bare yet beautiful essentials, this new collection permits for a well composed equilibrium.

It allows serenity to triumph over chaos.

Kelp Fortuna

Design by William Brand

Overwhelmed by the warm reception the Kelp collection received, William Brand was intrigued to experiment further and sought to add new elements.

The grand icicles, blown and pulled at the same time by our glassblowers, add a striking monumental facet to the frivolously shaped Kelp. To be able to create icicles of this quality and size demanded rigorous experimenting and exploration of new techniques. As the 16th century Florentine diplomat and poet Machiavelli wrote, 'It's better to be adventurous than cautious, as Fortuna is a woman'.

William Brand

designer / owner

William Brand (Owner/Designer) graduated at the University of the Arts in Utrecht, The Netherlands as an architect and sculptor.

As an award-winning furniture designer he for many years designed buildings and interiors for fashion brands, including the headquarters of BRAND VAN EGMOND. His interior designs are always minimalist, in contrast to his lighting designs which have a powerful sculptural presence. He considers his lighting objects to be "the cherry on the cake". His way of working is quite specific. Immediately after defining the concept he starts working in the workshop like a sculptor; experimenting and crafting while having the object grow in his hands, often with unexpected results. Therefore the journey is just as exciting and important as the destination.

Architects and other co-creatives are invited to discover the endless possibilities of customising our lighting sculptures.

We hope to inspire you through the different colours and forms of various compositions, just as we enjoy being stimulated by your requests. William Brand's background in architecture gives him the insight to fully understand the demands and challenges of your work. Combined with his experience he is the perfect partner to translate your needs into handcrafted reality.

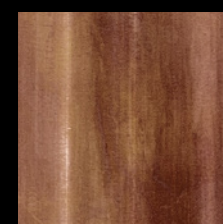

For our clients we not only customise to different dimensions, but also in different finishes: allowing for a truly personal lighting sculpture to be created.

The possibilities with our lighting sculptures are, in fact, limitless.

We would like to show some of the new possibilities.
