

NEW
COLLECTION

NEXT
LEVEL.

In our new collection we are taking it to the next level, crossing borders, raising the bar. We reach out to new materials, challenge existing shapes and focus on the multisensorial aspect of lighting as a tool, and as a system. Light, and much more.

MINIMALISM MEETS COMFORT

Maximum light comfort in linear lighting... the starting point in the design of the Inform. Sensual curves or pure lines, architectural lighting at its best: eye for design, eye for the user and eye for performance.

ENDLESS REFLECTIONS

In 2018 we presented Reflections, a series of new adventures in decorative luminaire design. In this new collection we expand on the range with Mantello and Still. Enjoy the fine craftsmanship, warm atmosphere and ever-changing elegant dynamic of these new designs.

NEXT GENERATION

Longstanding Delta Light classics Backspace and Walker have been upgraded, both in design and technology. Recognizable yet more advanced, illuminating exterior walls and pathways with class and elegance.

INVISIBLE YET TANGIBLE

Impressed by his extensive expertise and passion during the design of the Polesano, we decided to go on our next adventure with lighting designer Dean Skira. Together with Dean we take you on a journey to the ultimate minimalism, introducing Nime.

OPTICAL PRECISION

Delta Light's team of engineers and optic experts is on a continuous quest to match the company's credo for design with an optimal quality of light. With the new Frax we have taken our fascination for the perfect beam outside. Clean-cut light distribution to boost your outdoor experience.

Each new product family in this brochure has more to it. Scan the QR codes with your smartphone or visit our website to discover extra technical information, product versions, videos, application visuals etc.

INTERIOR

Delta Light offers a very extensive range of interior lighting solutions. Wall to ceiling or stand-alone, be it for recessed or surface mounted application... all luminaires are designed to guarantee an optimal user experience and highest quality of light, helping you to create the best atmosphere and meet the intended purpose of the space.

The following ranges are brand-new and complete the Lighting Bible AE interior collection.

NIME

**THE ABSENCE IN ITS PRESENCE,
THE PRESENCE IN ITS ABSENCE.**

The black hole reflects no light, but the light of Nime finds its way out.
The tangible part disappears inside its heart, and the intangible part
illuminates the object.

PATENT PENDING

THE FIFTH FORM OF LIGHT

The first form of light is
in the source.

The second is
the invisible form of light itself.

The third is the form of the object
revealed by light before it touches it,
the fourth is the form of the shadow.

And the fifth is the form of the
consequence that comprises all the
previous four forms, as well as the
way we feel and experience the space
considering the four forms.

BY DEAN SKIRA

Better not underestimate Nime, as the aperture of only 10mm is only the façade that hides away a host of possibilities to control your beam. Within the same opening and thanks to an ingenious set of custom optics, Nime allows you to focus the beam from 20° up to 40° and offers rotation up to 355° and tilting up to 30°, without changing its looks. With this magic trick, Nime lets you:

- Emphasize objects on vertical and horizontal surfaces, without visual appearance of the fitting or its source

- Light up small to large objects, even when they are not aligned with the luminaire.

- Perfectly address the light where it is needed, even in slope ceilings.

DEAN SKIRA is the founder of **SKIRA**, an award-winning practice based in Pula (Croatia).

Dean is travelling in light and walking through shadows. What started as design work with tangible forms, over the past 30 years, developed into building and creating with the intangible and the ephemeral.

INVISIBLE, YET TANGIBLE.

The effect is there, but where does it come from? With a miniature aperture of only 10mm, Nime focuses on what is important and puts it in the spotlight. It's not about Nime, it's about what Nime can do.

The combination of its focusable beam angle together with its adjustability allows for a multitude of application possibilities, while maintaining a uniform look and feel throughout the project.

deltalight.com/new/nime

KADET

With an installation height of only 60mm for Kadet S and 70mm for Kadet M, the Kadet range is an ideal solution for applications where recessing depths are very limited. Nevertheless, Kadet succeeds in offering a low glare trimless solution within this small height, thanks to the clever design combination of LED engine and optics: optimized visual comfort thanks to the recessed LED engine, optimized heat dissipation and optimized beam control. The smaller Kadet S is ideal for installation in hollow ceilings, while the bigger Kadet M can also be installed into concrete, thanks to its multifunctional recessing kit.

EN-SUITE

En-Suite is straight to the point. Delivering an ambitious 120lm/W with an outer diameter of just 54mm and 50mm height. Minimal recyclable components, efficient use of materials and high performing low glare optics, En-Suite is designed around efficiency in all its aspects and in every detail.

All this makes En-Suite perfectly suitable for energy conscious projects like hospitality and residential: easy to install thanks to its limited height and single circular ceiling cut-out. With options of IP20 and IP44, En-Suite follows through from general areas into damp locations like bathrooms and is highly energy efficient due to the 120 lumens per watt delivered on luminaire level. This high-performer makes it possible to perfectly light up a bathroom of 4m² with only 15W or a hallway of 20m² by consuming only 40W. En-Suite easily lowers the general consumption below 1,50W/m² per 100lux, quite a performance!

PION

THE QUEEN, NOT THE PAWN

The shape of Pion resembles a lot the one of a pawn in a game of chess, but that is also the only resemblance. Opposite to a pawn, Pion is able to move around freely thanks to its unique Ex-centric Rotation System (ERS).

Starting as a fix downlight, Pion can easily be turned into a periscope overlooking the room, simply by rotating its head.

The Ex-centric Rotation System then enables Pion to tilt its head, allowing it to spy around over 355° and tilt up to 90°, so aiming possibilities are unlimited.

Its elegant design in combination with the frisky colour combinations transform Pion immediately into the queen of the room, overlooking the scenery. Like any jewel, the colourful tubes serve as an accessory to top off its feminine shape in style.

deltalight.com/new/pion

BALANCED IN FORM AND FUNCTION

Pion is available as semi-recessed version, as surface mounted spotlight or as a plug-in module for our magnetic profile range.

As a recessed variant, the Ex-centric Rotation System is semi-recessed into the ceiling, hiding away the more technical part of the luminaire.

As a ceiling mounted solution - with up to 3 modules per luminaire - Pion is not only about the looks, it is a textbook example of form meets function.

In this way, the triple surface mounted version of Pion completes 4 functions. 3 of them are lighting up the room in 3 different ways from only 1 feeding point, the 4th is doing it without compromising on style. The clean lines of the driverbox perfectly complement the organic shape of the luminaire's body.

ODRON

TAKE ANOTHER LOOK

Don't be fooled: Odron may look peculiar at first sight, nevertheless its specific design is intended to create a compact yet powerful lighting solution.

A second look puts everything in perspective: the flat design of the disc in combination with the shallow base results in a highly functional luminaire within a limited height of 45mm.

As from now, any additional look on it makes you appreciate Odron more and more: its possibility to serve both as a straightforward downlight or as an omnidirectional spotlight, the shiny details of the cover in contrast with the structured lacquer of the body or the touch of colour it adds thanks to the additional golden cover, it is clear that Odron enriches the space in more than one way.

COMPACT FLEXIBILITY

Odron is available as Clip version and as a single or double spot to be mounted onto the ceiling or as module for our magnetic profile range. Whatever installation, Odron stands out in being compact without sacrificing on flexibility: semi-recessed as a Clip version or mounted into the magnetic profiles, all you get to see is its flat disc, able to rotate through the room up to 350° and tilt up to 90° thanks to the short hinge, perfectly hidden away behind the disc.

As a surface mounted spotlight, the driverbox is designed to be in line with the spot modules, limiting the total installation height of the luminaire to a bare minimum.

BOWIE

KEEP YOUR EYE ON THE BALL

Add some body to the room with Bowie, it impresses through its spherical shape.

Twist and turn, tilt and aim, Bowie will always look the same, whatever its direction and no matter the angle you look at it. Bowie in pure white or black easily fits in any interior and adds a touch of richness to the room.

Within its range, Bowie comes as a semi-recessed Clip version, as a single or double spotlight to be surface mounted or as module to fit into our magnetic profile offer.

SUPER-OH! SLIM

THE CIRCLE OF LIGHT

Evolving from our existing Super-Oh! family, Super-Oh! Slim stands out in design and efficiency. With a width of only 44mm and a luminous efficacy up to 119lm/W, this family of halo's combines slender elegance with big performance. Super-Oh! Slim comes in 2 diameters - 800mm and 1200mm - and is available with only direct light or a combination of direct and indirect light.

Two different designs allow you to either opt for clean lines in a soothing setting or either go for a design statement by choosing Super-Oh! Slim with an integrated powerbox. Apart from its functionality, the integrated powerbox acts as a rebel element, disrupting the perfect geometrical circle of light and adding a peculiar touch to the project.

SUPERLOOP PLUS

TOUCH OF STYLE INTEGRATED

New within the favorite series of Superloop are the horizontal versions with integrated decorative panel on top. The profile has an additional compartment on the upper part which serves to hold a decorative element, be it to add a personal touch, improve acoustics or make a decorative element out of the minimalistic circle.

Superloop Plus is available for all Superloop HC versions with a diameter up to 1200mm.

As so you can combine both Superloop SBL as MDL with an additional touch of style, one to offer general lighting and light up the panel, the other one to create accent lighting thanks to the additional spot modules that can be fixed onto the Superloop MDL.

deltalight.com/new/superloop

CONFORM

BY DEAN SKIRA

Its elegant design with multiple colour combinations, its specific sun-mimicking spectrum, its low UGR, its well balanced down-up ratio...we do not exaggerate: Conform is the goddess of office lighting!

Conform is designed around the light. It not only perfectly embraces the light source, it reinforces it in multiple aspects. Conform uses Delta Light's Natural Light Technology (NLT), state of the art LEDs with a spectrum that very closely matches that of the sun. That includes a broader spectrum, which is preferable for the human eye and brings out the vibrant colours, and an enhanced cyan energy, boosting the human activity.

As so, the LEDs used in Conform help control the human circadian rhythm. To further stimulate the human well-being,

Conform uses a down-up ratio of 55% to 45%, as a combination of direct and indirect light is recommended against eye strain. Every downwards facing LED is perfectly embraced by specially designed reflectors, resulting in a beam angle of 67° that enlightens the task area but has no direct impact on the eye. Additionally, the uplight is being spread over the room to enhance the spacial effect and to create a uniform lighting scheme, thanks to the inhouse designed lens extrusion to create a wide batwing beam angle without an intense peak in the centre.

INFORM

A WORKING TOOL

The Inform family is an extensive range of linear and curved lighting solutions, designed to be used in applications that include task areas, like landscape offices, meeting rooms, reception desks, home office, ... Areas which need technical architectural lighting at its best: eye for design, eye for the user and eye for performance. The base of this family is a combination of Delta Light's Melanopic Light Technology (MLT) with high efficient louvre optics.

ULTIMATE VISUAL COMFORT

Different from the fluorescent tubes, a LED array is build up out of multiple LEDs. Therefore, the reflector is designed to perfectly embrace every individual LED module in a way to boost the efficiency of the complete luminaire while maintaining a high level of visual comfort as every LED dot is shielded from being looked into.

INFORM SQ

PURE MINIMALISM

Inform SQ breaths refinement in all its aspects. Its slender dimensions of 28 by 28mm weld in seamlessly in any architecture. By letting the power run over the suspension cables, there is no need for additional supply cables, emphasizing the minimalistic looks of the profile.

The subtle details empower its sublime design: the recessed endcaps with integrated logo, the multiple colour combinations, the design of the powerbox in line with the profile design, all of them adding to the pure minimalism where Inform SQ stands for.

HIGH PERFORMER

Despite its minimalistic design, Inform SQ does not compromise on performance. With a delivered lumen package downwards of up to 3045lm per meter, Inform SQ is perfect for illuminating task areas like office desks or reception counters.

Within the same dimensions one can also opt for a down-up version of Inform SQ, enhancing the sense of space and creating a uniform glow on both vertical as horizontal surfaces, which leads to a reduced contrast and relaxes the eye.

HUMAN IN THE CENTER

The human aspect is the central topic for Inform SQ. It offers state of the art LEDs that help control the human circadian rhythm via a unique spectrum meant to stimulate activity. The high quality LEDs provide a very natural white colour with a higher amount of energy in the cyan region, helping you to be active during the day and encourage sleep at night.

Different geometric shapes - based on 1 curved segment - to feed your expressiveness and imagination: combine different forms, use quirky colour combinations, diversify different application areas by alternating Inform SQ with Inform R, feel free to play!

INFORM R

PATENT PENDING

CREATIVE FREEDOM

Who says light for the workplace needs to be boring? Inform R enables you to bring a touch of creativity into the clean and straight lines of the contemporary office environment.

Inform R is a family of atypical shapes which are still compliant with the EN 12464, the standard for office lighting. Different geometric shapes - based on 1 curved segment - to feed your expressiveness and imagination: combine different forms, use quirky colour combinations, diversify different application areas by alternating Inform SQ with Inform R, feel free to play!

COMING SOON!

D-LINER INFORM

SPECIAL CEILING SOLUTIONS

To keep up with the changing regulations for building and renovating, challenges arise on how to combine lighting, ventilation and acoustics into technical or smart ceilings in the best way possible. Part of these ceilings build on modularity and allow for a linear lighting solution in between or in line with the panels. The typical mounting brackets on D-Liner Inform allow for an easy installation into different kind of linear ceiling solutions. As the combination of high efficiency and a high level of visual comfort is crucial for offices - an area where this kind of ceilings are being made - D-Liner Inform is a perfect addition to the existing D-Liner range.

INFORM M

ACCENT, DECORATIVE AND TASK LIGHTING

Inform M is an addition to our magnetic profile range. For any multi-purpose area, now you have the possibility to combine the existing spotlight and pendant modules together with this high-performing modules for task areas. Create and recreate your desired setting, as each of these modules can easily be repositioned thanks to the simple magnetic connection between profile and module.

By simply clicking the module into the profile, the electrical connection is made and your luminaire is ready for the task, wherever you mount it. Additional sensor and modulator modules allow you to further upgrade the light setting to your preference, by DALI dimming or by using CTRL Delta on your smartphone.

FTL35 WG

As an addition to the extensive range of Femtoline profiles, this wallgrazer introduces new ways of integrating linear solutions into architectural lighting. As a member of the Femtoline range it also uses LEDflex inside its slender body, but its optical compartment generates new application possibilities, as it creates a grazing light along the surface, perfect to enhance textured walls or produce a dramatic lighting effect through its play of light and shadow.

CHOOSE YOUR POWER

Ledflex

650 up to 2100lm/m

-

5,1 up to 21,6W /m

CHOOSE YOUR ACCESSORY

Add a tilting set for a perfect alignment of the beam

The in-house developed lens extrusion is designed to fulfill multiple functionalities to create the optimal grazing effect.

First of all its specific shape generates a double light effect: in one direction it produces a small light beam to graze along the surface, even for higher walls, in the other direction the purpose is to widen the beam to obtain the same effect as wide as possible. Its second task is to do all of this without losing sight of the visual perception. Thanks to a special treatment of the lens, the LED dots of the LEDflex are being transformed into a uniform line of light without any obtrusive effect to the eye.

detailight.com/new/femtoline

FINTO II

Building on the flexibility of our Superloop, adding the refinement of our 2F track and shrinking down the design to the level of our Shelfline. The result? Finto II!

This miniature profile lets you combine accent lighting and decorative lighting in the shape of Microspy, Midispy, Hedra and Tweeter M.

Containing 2 48V and 2 DIM conductors for individual DALI dimming, the slender profile can easily be combined with Smart 48 and CTRL Delta to offer a quick and easy, minimalistic, wireless lighting set-up.

Finto II has many application possibilities, as its dimensions are reduced to a minimum which allow a surface mounted installation that only requires a minimum of space. Be it in residential, hospitality or in retail, the different modules to apply on the Finto II track can be used for accent lighting or decorative lighting, offering multiple ways of flexibility.

REFLECTIONS

Looking to complete our portfolio of technical architectural lighting we came up with a set of more decorative and expressive shapes.

The result is Reflections, presented for the first time in 2018. Reflections is a series of new adventures in luminaire design. A mission to improve the relationships between architecture, interiors, its users and visitors.

A poetic expression of craftsmanship, light, technology, texture, shape and mood. With these new collections we want to help create the right atmosphere, so that the experience of every space is filled in a warm and unique way. The following ranges are brand-new and complete the Lighting Bible AE interior collection.

With its timeless and inviting look the Mantello Pendant is well-suited for both home decor and professional environments. Hang a few Mantello pendants in the kitchen, place the smallest one each side of the bed, or create a playful configuration above the reception counter and start enjoying the right lighting atmosphere.

Starting from a circle, the bell-shaped design of the Mantello was inspired by both 80's Memphis shapes and early industrial characteristics. A modern interpretation of recognizable and traditional forms, available in two sizes and two diameters.

MANTELLO

Suspended from the ceiling the lamp brings a modernistic style and classic elegance to any décor. You can opt either for a matt lacquered aluminium shade, or the version in mouthblown, soft rounded glass. The variety in sizes, colours and led or E27 versions, allows you to tailor the Mantello to communicate with the style and needs of the room.

A particularly unique version in the Mantello family is the combination of the aluminium housing with the opaque sphere semi-hidden inside the shade. A very stylish combination ensuring a perfectly diffused and warm light effect.

Single or Triple suspension

The **STILL** lamp works as a mobile. This pendant lamp has the particularity of having the light source off-center from its point of suspension, creating an ever-changing elegant dynamic. Due to its big length it dresses and emphasizes a space, without the clutter.

detailight.com/new/still

Still...
or never completely.

"I always liked to play with counterweights to create movement and tension in my products. With the Still lamp, the rod of metal that creates the balance has the same diameter as the tube welcoming the cable. Screwed together, they create a perfect line and allow easy packing when separated."

Slay wild... moon child.

OUTDOOR

Founded in 1989 Delta Light has been designing and manufacturing sustainable and high-quality luminaires for many years. Exterior lighting has been an important part of the collection since its early years. As outdoor luminaires often need to withstand harsh weather conditions, Delta Light maintains the highest standards, both in the choice of material as well as in the production and coating process. The following ranges are brand-new and complete the Lighting Bible AE exterior collection.

Light and ambiance is not only for indoors, by combining light and architecture in outdoor settings, the city also remains vibrant at night. With its 7 different light effects and its multiple installation options, Frax has been designed for every aspect of the urban architecture: any form, any material or any composition.

FRAX

OPTICAL PRECISION

LED Caset® technology

Frax is based on Delta Light's LED Caset® technology, which combines multiple LEDs with individual collimator lenses per LED to generate a clean-cut light distribution.

The individual lenses create a multi-layered light distribution to generate a clean 8° or 14° beam angle.

Other beam angles or other light effects are being obtained by adding microlenses in front, sculpting the light into a 26° or 47° beam angle or into a linear or wallwash effect.

VISUAL WELL-BEING

Frax not only cares about the perfect light effect, it takes care about the passer-by as well.

Frax can be provided with an additional honeycomb or a snoot to reduce the possibility from directly looking into the light source.

Both of them reduce any undesired lighteffect and the glare associated with it.

MADE FOR HARSH ENVIRONMENTS

IP65

-
IK06 thanks to 5mm thick glass for Frax S
IK08 thanks to 8mm thick glass for Frax M

-

INSTALLATION MADE EASY

Apart from the extensive optical possibilities, Frax also offers a range of different mounting options. Standard, the luminaire comes on a round base, but one can also opt to install the luminaire head on a pin, on a strap or on a simplified bracket. In this way, Frax can easily be transformed to install in between the green, around a tree, a pole or any other surface. To facilitate the installation of multiple Frax luminaires, a degree scale is integrated on the hinge, perfect for precise aiming and a proper repetitive light effect.

In many ways, Backspace is a joy for the eye, be it by its slender design, by its pleasant light effect or by its playful colour combinations. Backspace is designed to create a 2-way light effect on the wall, the choice to install it in a horizontal or vertical way is up to you. By mounting the light source in the front part of the luminaire, it is perfectly shielded from looking directly into the source.

Backspace can be used for interior lighting in a white, grey or dark grey finish or for outdoor settings in grey or dark grey. An additional touch of colour can be added to the luminaires by opting for an extra golden reflector.

SPLIT THE LIGHT

Walker splits the light open. Starting from 1 light source, Walker is designed to guide the light into two directions to provide a double light effect on the surface below.

The light falls on the V-shaped inner part of the luminaire, breaking it open and throwing it to the front- and backside of the luminaire.

Walker can serve as a guiding light on your wall or pathway, as it comes as a wall luminaire and as a bollard.

Different sizes, different heights and multiple colour combinations can be combined to your preference to create the perfect setting.

Let me guide you through the night

SKOV

LIGHT AS A GUIDE

Skov is perfect as a guidance light, both for in- and outdoors.

The luminaire stands out in slenderness, with only 32mm of thickness for a surface mounted wall application with integrated power supply. The combination of a recessed LED array with the specific design of Skov generates visibility along the path without being obtrusive for the passer-by. The light leaving the luminaire gently falls onto the veil of Skov, revealing a soft light effect to guide you wherever the path may take you.

LOGIC40

The Logic range stands for a complete family of water and shock resistant lighting fixtures. Logic 40 is the newest addition to the family, a minimalistic recessed uplight with a diameter of only 40mm. With its small beam angle of 15°, it perfectly serves as an accent light to highlight any architectural aspect you want. Available with trim or as a trimless installation for an even more minimalistic look.

To take care of the visual well-being, Logic 40 either comes with a micro vizor inside or as a Moon version, shielding off the light that is thrown backwards. The perfect addition to accentuate green or sculptures, to highlight façade or small garden features, to create a sense of depth or indicate the right direction along paths and driveways.
