CREATING LIGHT

Through our luminaires, we go beyond function,
transcending into the realm of *Creating Light*,
illuminating spaces with brilliance, evoking emotions,
and elevating experiences.

Award-winning designs

INTRO

Since 1995, LIGHT-POINT has been producing innovative lighting products based on a long tradition for superior quality and craftsmanship.

Over the past 28 years, LIGHT-POINT has brought to market an extensive product collection in an ultra-modern and distinctly Danish design style, a language that continues to unfold today.

The company challenges the perception of what good lighting design can do, which have been rewarded with 9 design awards since 2019; Red Dot Award, iF Design Award and German Design Award.

LIGHT-POINT's products express a consistent approach: the quest for the ideal balance of perfect form, the latest in LED technology and something that is both aesthetically timeless and minimal design.

Every design LIGHT-POINT produces, whether it is light for a bathroom, table lamps, pendants for a living room or built-in ceiling and wall lights, has a unique emotive experience.

LIGHT-POINT's extensive product range is suitable for both commercial and residential markets, and the company works closely with architects and designers to find the perfect solution to suit the needs of all of their customers.

Today LIGHT-POINT products are available in over 50 different countries from Scandinavia to China.

AWARDS

2019

LANTERN collection
Design: Marie Holsting

LANTERN collection is based on the contemporary interpretation of a classic lantern. Rectangular glass panels framed by black lacquered aluminium combine to form a cuboid. The indirect LED source creates an interplay of geometric areas of light and shades, lending the collection an architectural appeal.

The collection includes portable table lamps, wall lamps and garden stands. All suitable for indoor and outdoor use.

LANTERN won a Red Dot Award, 2019.
Explore LANTERN collection from page 108.

2020

SOHO collection
Design: Ronni Gol

VANTAGE collection
Design: Nital Patel

SOHO is a wall-mounted LED lighting system, based on recessed round tiles that can be placed creatively on the wall in every imaginable pattern. The collection is a perfect mood setter, allowing you to freely create visual presence in the design of a room.

SOHO consists of 5 different sizes, allowing for overlapping patterns. Based on individual design, SOHO enables for unlimited number of tiles in one set-up.

SOHO won a Red Dot Award, 2020.
Explore SOHO collection from page 178.

VANTAGE is a state-of-the-art LED spot lamp that works optically, spreading light further, wider and softer. Replacing traditional reflectors with an optic glass provides glare free light, eliminating annoyance to the eyes.

VANTAGE won a Red Dot Award, 2020.
Explore VANTAGE collection from page 218.

2021

EDGE collection
Design: Nital Patel

ORBIT collection
Design: Ronni Gol & Nital Patel

EDGE results from the desire to design a premium collection of pendants that embodies the architectural international design style. The goal was a lamp that could distribute perfect light while looking both beautiful and sculptural.

EDGE won an iF Design Award, 2021.
Explore EDGE collection from page 88.

The basis of ORBIT collection is a shape that guarantees optimum function. There are no traditional plastic LED reflectors. Instead, the design features optical glass, which ensures optimum lighting without dazzling or irritating our eyes. The lamp was designed in such a way that at the end of its life, it can be fully recycled, thanks to its all-aluminum and glass body.

ORBIT won an iF Design Award, 2021.
Explore ORBIT collection from page 132.

2022

AURA collection
Design: Nital Patel

OPTIC LINEAR
Design: Nital Patel

AURA's design is based on the principles of the international architectural style, combining clean lines with technical precision. The collection includes both wall lamps, pendants and ceiling lamps.

AURA won a German Design Award, 2022.
Explore AURA collection from page 26.

OPTIC LINEAR embodies *credo form follows function*. Enjoy the sleek shape and superb performance of these elegant pendants. The optic glass provides a glare-free light and provides maximum light where needed. Each faceted spot on OPTIC LINEAR is seamlessly sculpted into the linear profile adding an aesthetic dimension.

OPTIC LINEAR got a German Design Award, Special Mention, 2022.
Explore OPTIC LINEAR from page 124.

2023

DARK collection
Design: Nital Patel

DARK is an optical task light that provides glare free light, eliminating annoyance to the eyes, making it the most comfortable work light in the market today. The design itself is reduced to its function. Precision workmanship, high-quality materials and precisely worked details such as the seamlessly integrated hinge design gives the collection its elegance. The tapered angles give the lamp a more 3-dimensional expression.

DARK consists of two table lamps, a floor lamp and a wall lamp and is available in a range of premium anodised colours. The collection comes with a number of accessories including a table base, wall mount and clamp.

DARK won an iF Design Award, 2023.
Explore DARK collection from page 68.

Edgy &

International

ABOUT

Ronni Gol **Founder / Entrepreneur**

Today, LIGHT-POINT designs, manufactures, and distributes light fittings for a broad international audience. With 30 years on the market behind it, LIGHT-POINT has long since established and manifested itself globally as an award-winning Danish design company.

"We're building on the same foundation, the same core values, and philosophies as when I founded the company: unmatched quality, the latest technology, high functional value, and a timeless aesthetic that's both elegant and ultra-modern, with a clear international approach."

LIGHT-POINT's DNA is simplicity, precision, and minimalism. Its style is discreet, refined, unmoving, and simple, yet also expressive and complex. It challenges limits, norms, and traditions, especially when it comes to decorative lighting – more sculptural lighting pieces where there's room to be edgy and unique, grab attention, and display character and charisma. They straddle the line between light fittings and art installations.

"I've always been fascinated by light – light and its effect. The right illumination shows off and emphasizes architecture. Light is one of the most important aspects of design in general, and especially when we want to create an ambiance, an atmosphere, and a sense of well-being. A lamp is more than just a light source. It can be a stylistic landmark and a design statement, but it's more than just a shape. It creates a mood, and it impacts our feelings and energy. Today, our design team in Copenhagen is constantly researching innovative ways to develop lighting for homes, outdoor spaces, offices, restaurants, hotels, and more."

EDGE LINEAR / Brass
Design: Nital Patel

SOHO W1-W4 / Brass
Design: Ronni Gol

ORBIT W1 / Brass
Design: Ronni Gol & Nital Patel

MIRAGE 1 / Brass
Design: Nital Patel

1.

1. The aluminium shell of the ORBIT WALL lamp.
2. Most LIGHT-POINT products are CNC machined from a solid block of aluminium. 3. Example of a final product: ORBIT WALL / Brass / Design Ronni Gol & Nital Patel

Circular Design

2.

"Around 75% of the almost 1.5 billion tonnes of aluminium ever produced is still in productive use today. Recycling aluminium requires up to 95% less energy than production from ore, avoiding emissions, including greenhouse gases."

The International Aluminium Institute (IAI)

ACHIEVING THE IDEAL FUSION OF FORM, FUNCTION & ENDURANCE

ACHIEVING MATERIAL HARMONY

One of the remarkable aspects of LED technology is its superior efficiency as a light source in today's world. However, in order to maximize its performance, LED lighting necessitates a distinct design approach. When LEDs are activated, a portion of their energy is converted into heat during the conversion process. Without proper cooling, LEDs can quickly burn out, significantly reducing their lifespan.

To address this issue, we have developed an innovative solution by attaching LEDs to aluminium. This integration allows the metal to absorb and dissipate the heat generated by the LED chips across a larger surface area. Consequently, the lifespan of the LEDs is extended, ensuring their optimal functionality.

EMBRACING DESIGN FOR DISASSEMBLY

At LIGHT-POINT, we are committed to fostering a more circular economy. Since 1995, all our products have utilized aluminium as the core material, recognizing its exceptional characteristic of being Infinitely Recyclable.

Our products are designed with disassembly in mind, aligning with the fundamental principles of the Built Positive movement. This movement advocates intentional design practices for buildings and products, promoting material recovery, value retention, and meaningful next use.

Each and every product we manufacture can be efficiently disassembled for recycling at the end of its lifespan.

WARRANTY

LIGHT-POINT is committed to ensuring you with the highest quality standards in luminaire manufacturing. It's just one of the great benefits that gives you greater value for longer.

Here's to at least 7 years peace of mind...

A large, bold, grey number '7' is centered on the page. The number is composed of a thick horizontal bar at the top and a thick diagonal bar extending from the top-right corner down to the bottom-left corner.

LIGHT-POINT SMART TUNE POWERED BY CASAMBI

Light isn't just light. No one knows that better than LIGHT-POINT. That is why we constantly do our utmost to design even better solutions. LIGHT-POINT isn't just about beautiful design. It's also about smart lighting and, above all, intelligent solutions.

Our collections, AURA, EDGE, and ORBIT, have made it even easier to create the perfect atmosphere and lighting – no matter where you are. We have future-proofed our most popular collections by integrating CASAMBI – an intelligent standard for lighting control that provides the unique option of playing with light.

We call it LIGHT-POINT SMART TUNE powered by Casambi. All these lamps have in common is that you can operate them with ease and simplicity using your smartphone. It's pretty straightforward. On the screen, tap the luminaire you want to turn on and off, swipe to the side to adjust the brightness, and swipe up or down to adjust the hue of the light from cold to warm – or vice versa – as required.

SMART  TUNE™

BRASS — A MODERN CLASSIC

Brass is a popular material. With its golden, deep, and warm tones, it fits perfectly into the Scandinavian world of colours – dusty grey, blue, and green tones, alongside most natural and earthy tones. In its brushed form, brass offers a soft, tactile surface, unlike most other metals. It is simultaneously classic and ultra-modern, masculine and feminine. It creates light that is exclusive and elegant, yet also cosy. Brass is the latest addition to our range of products.

ORBIT WALL MINI / Brass
Design: Ronni Gol & Nital Patel

AURA

AURA CEILING is the newest line extension to the award-winning AURA collection. The lamps have two or three flexible spots rotating around its own axis providing a glare-free light in any desired direction. Its design is based on the distinctive design style of LIGHT-POINT, combining clean lines with technical precision.

Besides from AURA CEILING the collection consists of pendants and wall lamps.

COMPACT

With clean-cut lines, made of aluminium
COMPACT is beautiful as well as functional.

Meeting the IP54 standard, the lamp is approved for outdoor use, but can, of course, also be used indoors.

COMPACT is ideal for lighting up driveways or garages. Use several lamps side by side for a striking impact.

COSMO

COSMO is a truly flexible spot, rotating around its own axis. The lamp works optically spreading the light further, lighter and softer. The optic glass provides a glare free light, eliminating annoyance to the eyes. The spot can rotate 350 degrees, providing maximum light versatility to a typical fixed spot.

COSMO has the recognisable cross-knurled pattern that is machined into solid aluminium, giving it a contemporary, yet elegant aesthetic at the same time. The diamond facets in the knurling texture have been softened to enrich the depth of the colours.

"DARK is all about the details that have been seamlessly worked into the function of the lamp. It's all aluminium construction provides lightness, making it an easy-to-use everyday task light,"

Head of Design, Nital Patel

DARK collection / Design: Nital Patel
IF Award Winner 2023

DARK is simply pure form, pure function!

DARK is the result of nearly two years of design and technical development and is quintessentially an example of the maxim *form follows function*. DARK works optically, spreading light further, wider and softer. The optics also provides glare free light, eliminating annoyance to the eyes, making it a comfortable work light.

DARK collection consists of two table lamps, a floor lamp and a wall lamp and is available in a range of premium anodised colours. The collection comes with a number of accessories including a table base, wall mount and clamp.

DROP / Rose Gold
Design: Ronni Gol

"There's a captivating beauty to that conical shape, seamlessly blending style and functionality. EDGE, without a doubt, stands as one of my favourite pendant lamps, embodying my design aesthetic. Even after being featured in our portfolio for several years, it remains a timeless piece that I wouldn't alter in the slightest."

Head of Design, Nital Patel

EDGE collection / Design: Nital Patel
IF Award Winner 2021

EDGE results from our desire to design a premium collection of pendants that embodies the architectural international design style. The goal was a lamp that could distribute perfect light while looking both beautiful and sculptural.

The collection has several features, elegantly underscored by its conical shape. So, the widest side is designed to provide excellent, functional light, whereas the narrower side provides more ambient lighting. EDGE's iconic shape lends a lovely aesthetic touch to any ceiling or wall, making an interior more cutting edge.

The collection features both circular and linear lamps all made of top-quality aluminium, and available in Rose Gold, Titanium, Carbon Black and Brass.

MIRAGE

MIRAGE WALL is a wall lamp designed in a form intermediate between a square and a circle, combining clean lines with technical precision. Viewed from any angle, the spot takes a new visual expression.

MIRAGE W is IP65 rated and has an integrated water drainage. An optional wall bracket accessory provides extended mounting possibilities and comes included with every lamp.

The lamp comes in a range of colours including our newest colour for outdoor, rust.

OPTIC LINEAR / Rose Gold
Design: Nital Patel

The OPTIC collection embodies *credo form follows function*. Enjoy the sleek shape and superb performance of these elegant spot lights and pendants. The optic glass provides a glare-free light and provides maximum light where needed.

Each faceted spot on OPTIC LINEAR is seamlessly sculpted into the linear profile adding an aesthetic dimension. The surprise is the consistent spread of light on the surface as opposed to circles of light that would generally be expected from spot fixtures.

General measurements for all OPTIC LINEAR sizes

"We are very honored to receive this world-renowned design award for our ORBIT collection. It is an outstanding recognition of our work – not only when it comes to creating light, but also innovation."

Head of Design, Nital Patel

**ORBIT collection / Design: Ronni Gol & Nital Patel
IF Award Winner 2021**

The idea of ORBIT was to create an innovative high-end collection based on the concept of *form follows function* and to come up with a new take on the familiar LED lamp, right down to the smallest detail.

The bases of the design is a shape that guarantess optimum function. There are no traditional plastic LED reflector. Instead, the design features optical glass, which ensures optimum lighting without dazzling or irritating our eyes. The glass also helps distribute the light elegantly – further, more widely, and, in particular, more gently.

ORBIT is an extensive collections covering wall lamps, floor lamps, pendants and outdoor garden bollards. All made of top quality aluminium.

RAW

RAW – CONTEMPORARY SIMPLICITY

RAW is an attitude of refined simplicity and technical precision that has become synonymous of LIGHT-POINT's design style. The RAW spot lamps feature the brand's newest signature, cross-knurled pattern that is machined into solid aluminium, giving it a contemporary, yet elegant aesthetic at the same time. The diamond facets in the knurling texture have been softened to enrich the depth of the anodised colours.

General measurements for all SLIM sizes

SOHO

Create dynamic movements or calm uniformity by combining different sizes and colours of the SOHO collection.

There are no creative limits with the award-winning SOHO lamp. SOHO is a wall-mounted LED lighting system, based on recessed round tiles that can be placed creatively on the wall in every imaginable pattern.

The collection is a perfect mood setter, allowing you to freely create visual presence in the design of a room.

SOHO / Black
Design: Ronni Gol

SOHO W1-W5 / Brass
Design: Ronni Gol

"With aesthetically backlit surfaces, the SOHO lighting system achieves a fascinating overall appearance and offers a high degree of flexibility."

Red Dot Award Jury

SOHO collection / Design: Ronni Gol
Red Dot Award Winner, 2020

reddot winner 2020

The SOHO lamps present a contemporary twist on the classic round wall lamp, making the lamp a perfect fit to create a unique distinctive expression. They can be arranged in various imaginative and artistic formations, clustered together, arranged in rows, or forming patterns. Whether showcased in a single color or a combination of colors, the lamp becomes a statement piece. Thus, when hanging alone, it takes on a different character and attitude altogether.

SOHO is ideal for multipurpose rooms in residential homes as well as in shops, studios, showrooms, offices and hotel lobbies.

SOHO consists of 5 different sizes, each recessed slightly further away from the wall, allowing for overlapping patterns. Based on individual design, SOHO enables for unlimited number of tiles in one set-up.

The collection is available in a range of colours to choose from. The palette includes black, white and gold in a structured powder coated finish, and a rose gold, titanium and brass in brushed finish. Each lamp is made from CNC machined high quality aluminium, which has been the best choice of material for absorbing heat created by the LEDs.

SURFACE

SURFACE can be used as a traditional ceiling pendant with the aid of a suspension kit.

This allows the lamp to be suspended up to two metres down from the ceiling, and consequently makes rooms with high ceilings seem more welcoming.

It can even be fitted vertically to a wall as an elegant, glowing circle. This is ideal in large walk-through areas, for example. This way, the light source becomes part of the décor.

"The VANTAGE spotlights impress with their high lighting comfort and blend in discreetly with different interiors."

Red Dot Award Jury

VANTAGE collection / Design: Nital Patel
Red Dot Award Winner, 2020

reddot winner 2020

VANTAGE is a state-of-the-art LED spot lamp that works optically, spreading light further, wider and softer. Replacing traditional reflectors with an optic glass provides glare free light, eliminating annoyance to the eyes.

The collection is made up of four sizes and five colours; in a structured powder coated black and white and in a brushed rose gold, titanium and our new colour brass. Each lamp is made from CNC machined high quality aluminium which has been the best choice of material for absorbing heat created by the LED.

VANTAGE

MAXIMUM LIGHT VERSATILITY

The conical shape adds an aesthetic dimension to any ceiling or wall. The spot can be pivoted at 90 degrees to the mounting point and rotated almost 360 degrees, providing maximum light versatility to a typical fixed spot lamp.

VANTAGE 2+ / Black

Beam distribution

We provide 7 years warranty for all LIGHT-POINT luminaires
(This excludes batteries)

General terms of sale and delivery

The following terms and conditions cover all deliveries and services from LIGHT-POINT A/S, unless other terms have been agreed upon in writing.

Tender

A tender is binding for three weeks from the date of the tender.

Dispatch/return of goods

Delivery will be EXW LIGHT-POINT A/S' warehouse (Incoterms 2000) unless other terms have been explicitly agreed upon. When buying any of LIGHT-POINT A/S' goods for resale buyer shall defray all freight charges himself.

Dispatch will take place at buyers' own account and risk. When delivery has been agreed to be free of carriage the cost of dispatch is included in the price and the dispatch will be at the risk of LIGHT-POINT A/S. Buyer is only entitled to annul the order due to delay provided delivery is delayed for more than 30 days. Returned goods will only be received when prior agreement of return has been reached and then only in the original wrapping and in an undamaged state. A copy of the delivery note or the invoice must accompany the returned goods.

Erroneous orders for standard goods will be deducted 20% for handling and control. Special goods, procured goods and unwrapped light sources will not be accepted for return.

Prices

All prices are current prices exclusive VAT, government taxes and light sources unless otherwise stated. All prices are stated without prejudice to printing errors, price changes and discontinued goods.

Payment

Unless otherwise stated in LIGHT-POINT A/S' tender or other written agreement our terms of payment are net cash at delivery/collection. At delay in payment a fee of DKK 100.00 and interest of 2% per commencing month will be added.

Notification of defects

Buyer is obligated to examine the goods immediately after receiving them. Notification of defects must be given to LIGHT-

POINT A/S within 8 days of delivery. If buyer does not notify LIGHT-POINT A/S of defects within this time-limit he will not be able to cite any defects at a later date. Expenses incurred by buyer in connection with cited defects are not covered by LIGHT-POINT A/S unless LIGHT-POINT A/S has received the notification of defects and has given a written acceptance to cover the costs.

Warranty

Products which have a manufacturing fault or a flaw in the material will be repaired without cost or exchanged in accordance with the rules in the Danish Sale of Goods Act and to the same extent that the warranty from sub-suppliers covers. Light sources are not covered by warranty.

Exemption of liability

Non-fulfilment including delay or delivery of defective goods will only justify buyer compensation provided buyer documents that the non-fulfilment is caused by gross negligence on the part of LIGHT-POINT A/S. However LIGHT-POINT A/S is in no case responsible for operating loss, loss of time, loss of profits or other like indirect losses including daily fines inflicted on buyer.

Product liability

The company is only responsible for product liability in accordance to the rules in the Danish Product Liability Act. Beyond this the company is not responsible for product liability.

Disputes

Disagreements in connection with the cooperation of the parties with reference to this agreement must be solved according to Danish law, in as much as the parties agree that the venue shall be the Maritime and Commercial High Court in Copenhagen or alternatively the City Court of Copenhagen.
