## MAKING THE EXTRAORDINARY.

*Immerse yourself in our new catalogue made especially for you. Do it slowly, as you travel through. Let yourself be inspired by extraordinary Modular Lighting Instruments designs. Look at the attention to detail, surprising light effects, the unusual style. Visualize each one as a functional and sophisticated luminaire that will communicate an original, elegant expression to your architectural lighting projects.*

*Strong lines to bring vertical structure to your space, Extruded takes its own place. Its small looped hook at the tip peeks out subtly. The graceful lines that carve the outside of Extruded's tube never fail to capture your curiosity. All the way at the bottom, the conical lampshade offers a well-defined, flood beam of light, inviting intimate dialogue.*

## A story of light and lines

Watch Extruded tell a new story at every moment, thanks to the extrusions that catch light differently as the hours go by. The carefully designed ribs bring richness to the luminaire. Structure your space vertically with any of the 3 offered lengths or create a rhythm by playing with vertical lines. Or simply, let Extruded be. A graphic architectural element.

## Vividly present & future-proof

Make Extruded's presence in a room even more pleasing by adding warm dim technology. Lower the brightness, and the colour of the light becomes warmer. This results in an instant magical glow, and cosy feeling. Think about different installation options as well. Semi-recessed or surface mounted, with or without integrated LED gear, which comes with different dimming technologies, or Casambi-integrated smart lighting.

## Colours for statement

There's only one way to decide which of the several colours, or colour combinations will suit your space. You'll just have to discover yourself. A matt white finish and many rich anodised colours, matched in predefined colour schemes are making Extruded a tempting luminaire to play with. A thin, long, black steel cable gives you freedom in deciding the height above your perfect, chosen spot for Extruded.

# KOMPAS & HOOLAHOOP

Design — Jeffrey Huyghe

*Kompas is an answer many interior professionals have been looking for. Many lights for the whole room, on just one power source. Our attractive circles invite your imagination to compose a unique chandelier. You'll be hard-pressed to choose which pendants to use in this party of light!*

## Create your chandelier with Kompas

Kompas is a ceiling base made to give you a ring of possibilities. Use its connection points to add pendants. Keep it subtle with just a few or choose a combination of architectural lights - dare we say up to 12? Position them how you prefer, around the edge of the base. The result will be a truly unique and playful chandelier.

## Hoolahoop will expand your ideas

Make your chandelier even more expressive by adding a ring around Kompas. Hoolahoop shows an impressive volume and helps you extend the reach of your luminaires. This gives you the option of expanding your circle of light by having the different light sources hanging at greater intervals and at different heights.

## Play with light and colours

A perfect solution for spaces with limited electrical points. All you need is one connection point and you can choose whether you want it with or without integrated dimmable LED gear. Our circles are available in white or black structure, and you can add a rich splash of colours with any of the pendant lights that fit on Kompas.

# TETRIX

*We had a bit of a game in mind when we designed our recessed spot, Tetrrix. Playing with pieces, fitting them together in all kinds of intricate ways. Easy to play with, and for everyone. Tetrrix invites you to give it your personal touch with design options and accessories. It's versatile, fits everywhere, and is a breeze to install.*

## It all fits together

Tetrrix is a new family of recessed downlighters with many possibilities. Compose your Tetrrix with a choice of design, installation and accessory. Create your personal style and combination by simply playing with everything. All components can be clicked into another interchangeably.

## Plenty of playful

Tetrrix offers a choice of lighting accessories (black structure only), adding visual comfort, aesthetics, fun and individuality to each design. Try honeycomb and snoot, already part of our Qbini family, or our light cones in two sizes.

## Connected, easy install, everywhere

Turn Tetrrix (gear excluded) into a smart lighting solution by linking a remote driver of your choice with a Hue or Casambi module. Tetrrix's installation is easy peasy, with a recessed ring of adjustable height, or an installation ring with flange. An IP55 rating for all LED dedicated designs, including the adjustable version, and an option for using a GU10 socket, truly makes Tetrrix for everywhere.

# PLACEBO

Design — Jeffrey Huyghe

*Born out of the mystic mind of Jeffrey Huyghe, Placebo quickly became a large product family. Placebo is shapes, sizes, up and down lighting, and stylish shades to dress it up. Also available as a pendant light for our 48V track system Pista, Placebo becomes a multitude of playful general lighting.*

## Playful Placebo effect

8 models to start from. Imagine a row or flock of changing Placebos, above a dining room table or a long counter space. Alternating between up and down lights, a tube shape or a ball shape. Go for Placebo with warm dim, tune down the intensity of your light and enjoy a change of colour temperature to a warmer, cosy light.

## A feast of mix & match

All of Placebo's aluminium LED units are available in white and black structure, anodised champagne, bronze, silver bronze and black. Decide on a finish, then move on to choosing a tube or a ball shape, each in 2 sizes, with an up or down light effect. Also, add volume and presence to your Placebo expression with any of our 3 shades, Douli, Beanie and Sombrero. And watch the light effects they create!

## Complexity in disguise

Deceptively simple in appearance, this pendant light hides intriguing features. How can both up and down lights look so identical? Hint: the up light reveals a small hole at the top of the glass. So why then, can't we see the cable through the glass? A 3-layered, hand blown glass does the trick.

# TULIP

Design — Studio Kees

*An architectural pendant light that comes in two complementary shapes, Blossom and Bloom. Also available with a track adapter to combine with a 230V track rail, and designed to fit E27 light bulbs, Tulip is truly accessible. A complementary design that displays both cosy mood light and general light. Full of grace and elegance, Tulip is the couple no one can miss.*

## Designed for each other

Elegant, balanced, made to fit together, Blossom and Bloom. Look closely at the clever design, and you'll notice that the top part of the body is identical in both. From the center line and down, the angles of the cups are complementary. A smooth parallel line emerges between the shapes and enhances the architectural quality of Tulip's design.

## Black, white, golden inside

Tulip invites you to play with its colours. A couple in black or white structure. Experiment with many in one colour or mix them with both. Designers can add a third colour, a stunning gold finish on the inside. An irresistible glow will create a soft, warm ambience with each Tulip.

## Flowers easy to handle

With its E27 socket, Tulip can be paired with LED retrofit bulbs. Go a step further and opt for connected-ready Hue bulbs that enable tunable white, coloured lights, warm dim and lots more. Bright and cool, warmer and ambient. Hue's a natural match to Tulip, as it reflects the rhythms of a flower's reaction to sunlight: open by day, closing at night. And thanks to Tulip's chalice, the bulb remains unseen, leaving its design uninterrupted.

## Tracking Tulip

This track 230V feature of Tulip's makes it very interesting for hospitality, retail and even residential projects, where changing the position of lights occurs more often. This addition is a simple, easy and budget-friendly solution for spaces with limited electrical points.

\*output for white struc, 3000K

*Shellby for general lighting and Shellby for creating mood. A clash of functions, yet the exceptional coexistence of purpose. Sun or moon? Definitely both. Powerful from above, it indisputably lights and energizes daily activities. Softer and a little to the side, it inspires calm and warmth. Shellby's playful and asymmetrical design lets you experiment with aesthetic effects that will charm the entire room.*

## General light and mood

Our Shellby is quite unique. It offers general lighting by day, and turns into a lovely mood maker by night. Dim it, with or without integrated warm dim, on ceilings or on walls, it's your light story to tell.

## Many Shellbies

Express your space with more than one Shellby. Its asymmetrical, deep-recessed design and seemingly floating sphere add to its playfulness, and enable you to create all kinds of artistic patterns and configurations.

## A personal touch of colour

Shellby skin is a decorative inlay made to easily click in Shellby's inner cup. Add a warm, cozy touch to your space by choosing from 4 anodised colours: silver bronze, bronze, champagne and gold. And for a seashell look, experiment with our new pearly white colour. As the light is on, pearly white gives a neutral white look & feel. Off, its unique finish will change to shades of purple, blue, green, and more, as you walk around the luminaire.

PRIVATE RESIDENCE, UPPSALA (SE)

# MODUPOINT LED

*A contemporary version of our iconic Modupoint, our new Modupoint LED is a modular lighting system with a wide range of ceiling bases, mounting options and miniature spot designs. It is an attractive solution for adding a minimalist style to both renovation and newly built projects.*

## Recessed or surface-mounted

Modupoint's original recessed mounting option is for extreme minimalists, even more so if you go for a trimless look. A tiny jack inviting you to plug in any of our miniature designs. Now, a new, deep-recessed cove-like base, trim or trimless, offers even more fun options for adding a little mystery to your expression. For more challenging renovation projects, try one of our surface-mounted ceiling bases with 2 or 3 jacks.

## A feast of miniature lighting

Once you choose your Modupoint mounting option, it's up to you to choose from a party of miniature jack spots. Start playing and mixing to get your selection just right. Marbulito, Médard or Minude against the wall or ceiling will offer a dramatic flair, while the suspended jack variants will create a more private area. Add more layers of light by using different sized extension sticks on our miniature spots.

## Connected-ready, ready for life

Now, with so many lights, heights, colours and styles, we couldn't skip the option of adding a dimming system. Modupoint's ceiling bases can be fitted with different dimming protocols: Tre dim, 1-10V, DALI and Casambi, a powerful connected system that gives users the option to control smart lighting and transforms Modupoint LED into a true light for life.

LOTIS - SILVER BRONZE  
SHOWROOM, AMSTERDAM (NL)

# LOTIS

*Lotis is the recessed spotlight where it all began. The hallmark of this luminaire is its deeply recessed, fine-edged cone that unveils the light source. Known for its effortless design and high functionality, Lotis comes with different light sources and smart lighting options, and in several colours.*

## Light on the wall

Asy lotis has all the features of a typical Lotis family member with one additional benefit: asymmetry. The light shines down at an angle of 28°, creating an attractive wash effect on the wall.

## A splash of new colours...

Lotis 82 offers several finishes to add a splash of colour to your design. The original white structure, the new black structure and the new wet painted and brushed bronze, silver bronze, black, champagne and gold. All of them with visible brushed lines showing an authentic, strong architectural look & feel. Perfect for matching with other Modular families such as Thimble or Minude. The new colours are available for 3 types of Lotis 82.

## ... For 3 Lotis 82 family members

With Lotis 82 GU10, a GU10 lamp of your choice needs to be added. The Lotis 82 GU10 for smart lighting variant comes with an included Hue bulb. You can choose between Tunable White or 2700K white. Finally, Lotis 82 for LED, with our M-LED 50 module, offers warm dim, 3 beam angles: medium, spot, flood, 4 colour temperatures: 2700K, 3000K, 3500K, 4000K and a more and a more powerful lumen output.

more info? [supermodular.com/en/nude](http://supermodular.com/en/nude)

*Nude's pure geometrical lines are ideal for highlighting architectural features. Nude is stripped down to the essence of a luminaire. Its light source is recessed in the slender cylinder so much that it is practically invisible. The wall-mounted version is available as downlight, or with both up and downlight.*

## Dress up Nude with colours

With an extended range of brushed aluminium colours, Nude will be a lovely colourful-yet-minimalist companion to any of our families with matching colours, like Shellby, Thimble, Minude or Placebo. Enjoy our extra choices of anodised black, bronze, silver bronze and champagne.

PRIVATE RESIDENCE, MUNICH (DE)

HOLLOW 125

HOLLOW 115 TRIMLESS

# HOLLOW

Design — James Van Vossel

*For designer James Van Vossel, it was time to rethink pure, simple forms. That's when the tube came in. And out. His creation, Hollow, reignites the excitement and mystery surrounding this classical shape. How does it work? Where's the light coming from? Lit or dark, open or closed. A symphony of opposites, Hollow is the luminaire that works with you. Adjustable and versatile. For spaces that welcome intrigue and personality.*

## Design that pops

Hollow expresses itself as you interact with it. It's playful and loves a good mystery. One design, invisible and visible. In one way, its integration makes it hide, being one with the environment, showing nothing but glowing cavities. In its other positions, Hollow complements ceilings or walls, a slight extension of the surface, casting light in an ocean of space. Hollow is a surprise and won't be revealed until you touch. Needless to say, the shy need not apply.

## Present, not present

Rediscover light with Hollow's marvellous, unusual adjustability. Hollow's smooth rotation system slides open to let you choose a 90°, 60° or 45° angle, or anything else in between. A powerful beam comes out one end, and a glow can be seen from the back side, reflecting off the inner curve of the cup. When completely horizontal, Hollow offers a discreet, ambient light emanating from each end of the tube. Designers can play with different light effects to change the ambience.

## Colours to caress

Experiment with colours and use the cup's inner glow as an additional light source. Gold for a warm, cosy mood maker. White, for a decisive indirect light effect. Black, for a stronger presence, but with softer, indirect light.

# MINUDE

*Our miniature spot is an extremely simple cylinder-shaped light fixture with a lot to show. Endless applications, a variety of rich colours, phenomenal yogic flexibility. A deep-recessed light source for a glare-free light effect. To express a refined and minimalistic look & feel on walls or low ceiling executions, on high ceilings in its stand-alone suspended variant. Or go for more than one Minude, on our Pista track or Modupoint LED jack system, as spot lights or suspended. This little spot will make a big impression.*

## Pure form, rich colours

The pure cylindrical shape with a thin, sharp edge and curved inner side hovers stylishly from a thin 2m matt black cable. Showing off its 6 rich colours – black ano, champagne ano, bronze ano, silver bronze ano – achieved by anodization, and two additional colours, powder painted black and white structure. All variants have a matt black back side.

## Quality lens and light

Minude's light quality will not be outshined by its minimalist design, however. Its beautifully concentrated light beam projected from a deep-recessed LED light source, provides a pleasant light output. Its sophisticated lens technology is well protected by the inner edge snuggling right up to the glass lens.

THIMBLE 74 - ANODISED CHAMPAGNE

THIMBLE 70 TRIMLESS - ANODISED BRONZE

# THIMBLE

Design — Jeffrey Huyghe

*Thimble evokes minimalism, surprise and technology all at once. Subtle curves, slightly revealing colours if desirable, high-quality lens and LED. For high-end residential or hospitality settings. This versatile, elegant architectural downlighter will bring pure design, sophistication and definition to any space without stealing all the attention.*

## Bare essentials reveal a sophisticated design

Thimble's composition emphasizes that elegance lies in pure form. A minimalistic, curved design, with a deep-recessed and glare-free light source. Thimble's clean, ultra-thin flange or trimless execution will go unseen in the quietest of spaces.

## A low-key execution with a little more

For light expressions that should be discreet but show that little extra, designers can find the perfect compromise with Thimble's long list of anodised colours. This desired, enhanced effect can be created on any ceiling application.

*Marbul is an ideal choice for residential, hospitality and retail projects. Direct light with a simple twist of the lamp units, each with its own dedicated LED module. With Marbul also available for our Pista 48V and our 230V track systems, the family is getting more versatile and warmer. All Marbuls include the option to interchange magnetic reflectors in aluminium, champagne or gold colours. Add warm dim technology to fine tune the mood even more.*

## Asymmetry rules

The elegant surface-mounted luminaires enable you to direct light with a simple twist of each lamp unit. Thanks to Marbul's streamlined driver box, the 1, 2 or 3 spheres appear to float against the ceiling. The unique magnetic coverplate keeps screws and wires neatly out of sight.

## All-round sophistication

Marbul recessed is characterized by a thin trim of 5mm through which 1 or 2 spheres appear to hang gently from the ceiling without any visible attachments. Adjustability remains the same: lamp units can be rotated 360° and inclined approximately 45°.

## Adding more dynamism to an original

Marbul suspension comes with a particularly thin, matt black cable and a fixed or adjustable sphere. Choose a gold, champagne or aluminium reflector to pimp your desired light effect. The adjustable version features a small cap that can be used to incline the sphere by approximately 45° to highlight specific elements in a room, and the cable itself can be rotated around 360°.

\*output for white struc, 3000K, 25°

*Inspired by the yin-yang symbol, a sinuous 2mm S-shaped line divides Semih in two equal, complementary parts: the hard, solid part mounted to the ceiling and the soft, round lamp housing emitting light. Semih is exceptionally easy to install, thanks to strong mounting magnets. Now in two sizes, Semih is an award-winning luminaire with positive, directed energy.*

## Flexibility par excellence

Semih's flexibility is an integral part of its design. Closed, a sober downlighter with an air of mystery. As the bottom part slowly twists open, it reveals a soft light that flows with movement illuminating the surroundings. Turn it horizontally up to 355°, and tilt it vertically up to 70° on either side. Highlight objects that tell a story or special places that tell a dream.

## Two sizes, many spaces

Semih comes in two sizes, ø86 and ø61. The original Semih, whose size and performing light were originally designed for multifunctionality in retail and hospitality, offers various types of light accents. Semih 61's application opens itself further to residential settings and small boutiques, where more subtle lighting is suitable. Thanks to a powerful magnetic plate in the ceiling, installation is clean and easy, without any visible screws. Semih 61 also fits on our 230V track rail system.

## Installation made easy

Installing Semih is a breeze, requiring no visible screws. Just mount the ceiling panel to the ceiling and let the powerful magnets do their job. The reflectors, too, are clicked on a magnetic inner panel, facilitating replacement. What's more, as all the gear is integrated into the fixture, Semih can be smoothly connected to a 230V standard wiring during renovation works.

# MEDARD

Design — Bleijh

*It's the stick insect that inspired the Dutch design agency Bleijh for the creation of Médard. Highly flexible thanks to its orientable head, Médard can sit still as a standalone on a desk, or on the ceiling. In its miniature form, it looks graceful on its own, on a ceiling or as part of our Pista track or our redesigned Modupoint LED jack system. Médard even comes with a stretched neck supporting 1 or 2 light units.*

## Table, ceiling, wall or track?

First, it was one sleek design. Modularity and fun ensued. From a table lamp, to more subtle surface-mounted and recessed ceiling applications. Add lovely wall versions and a playful track variant, or plug it in our easy-to-install Modupoint ceiling base with or without extender sticks, and you've got yourself full-blown modularity.

## Matching sizes, matching rings

Médard 42 is the minimalistic member of the family, gracing walls or ceilings as a standalone, or sliding playfully as a smaller spot for our Pista track (48V) and our redesigned Modupoint. Médard 70 is a solid eye-catcher as a track spot (230V). And of equal diameter, Médard ceiling beautifies spaces as a surface-mounted and recessed luminaire.

## More lights, more spaces

Médard opens itself up to welcome more light. Médard stretched comes in two adjustable tube lengths: 300mm and 500mm and can support two light units. What's the opposite of stretched? Médard's distinctive and charming rounded edge is all you see with Médard recessed (ø42 and ø70). The matt black inner ring, same in all variants, combats glare and promotes a homogenous look.

*A portmanteau of ‘cubic’ and ‘mini’, w introduces modular, miniature, recessed LED lighting solutions to residential and hospitality venues and boutiques. Qbini allows to effortlessly express a unique lighting concept in every project. Available in a load of shapes, frames, colours and accessories, Qbini combines choice with exclusive design and high-quality lighting technology.*

## Small in size, great in light quality

Our smallest recessed portfolio at 44mm square, Qbini’s patented press-in, press-out technology makes installation simple, no screws required. Despite being sources of illumination, each Qbini unit has a tactile, precisely-machined appeal that fits in the palm of the hand.

## Endless combinations

Qbini can be combined with 2 different frames: with or without a trim. Both of them are available in 1X, 2X, 3x or 4x lamp configurations. Its new surface box (driver included or driver excluded) gives you even more choice! Mix, match and create your preferred configuration.

## Patented precision

Qbini’s patented press-in, press-out technology makes it a breeze to install. The family’s small size, cutting-edge design and dual positioning options (recessed or deep recessed) add a modern yet cosy touch to any intimate space.

# SMART

*Designers can stay up all night trying all sorts of things with Smart, Modular's most versatile range of architectural lighting. Mix and match, from a mosaic of shapes, sizes, colours and mounting options, and create a playful installation while maintaining a consistent look and feel. The Smart choice for any application.*

## 3 designs that multiply

Smart's 3 designs are already a party for designers. Fun, curvy shapes, small and charming. Double the fun, Lotis, Cake and Kup come in fixed and adjustable versions. Adding colour to double fun, all variations are available in black structure, white structure and a warm, golden finish, and can further be combined with all Smart accessories. How's that for a party?

versions	3 designs: Cake, Kup, Lotis - fixed & adjustable 4 sizes: ø48, 82, 115 & 160mm
accessories	mask - 1X, 2X surface box - 1X, 2X surface and suspended tube - 1X wall tube - 1X, 2X ball - 1X
colours	black structure, gold, white structure, alu brushed

## Limitless combinations

A list of accessories lets you play with shapes and depth. Smart mask is the opportunity to play with round lights surrounded by a square or rectangular shape. Smart box adds dimension by protruding from the ceiling, hugging any of the 3 designs in any of 3 the colours. Smart tubed, suspended, surface-mounted on the wall or ceiling, gives depths to the circular design, emitting down/up light. Smart tubed 82 slides in elegantly as one of our newest accessories for our 230V track rail system.

## Join the ball

The accessories list marches on. The latest, Smart ball, flaunts a bubbly, spherical shape, available in two sizes: Smart ball 82 and Smart ball 115. In white or black structure, it hangs gracefully from a thin matt black suspension cable. As with the other accessories, combine Smart ball with a differently coloured light in any of the 3 designs, for a little contrast and fun.

\*output for white struc, 3000K

*Pista is the ultimate in modern aesthetics, introducing thinner, slimmer magnetic track rails, even smaller light fixtures and ultra-thin cables. But Pista isn't just about miniaturization, it's also about personalization. Designers can create unique configurations and play with different modules on single or multiple track rails in different lengths, light effects and colours.*

## Functional LED, infinite lines

Different LED modules, entirely different effects. A beautiful general light line with a powerful lumen package. A subtle Night Light for pure design, and more ambient, intimate lighting. A surprising module flaunting a trail of tiny & impressive LED spots (8x, 16x), creating accents when desired. All modules can be integrated seamlessly, flush with the surface. Also, for a slight, glare reducing effect, a new linear module with thin flaps on either side can join your project.

## One spot, two spots

Integrate dynamic accent lighting with linear LED by subtly inserting minimalist spots. Marbulito's lens gives a nice sharp round light contour, while Médard's reflector renders a softer circle of light. For more variation, both Marbulito & Médard are available as twin light units, decreasing the space between two lamps. Marbulito suspended is also available with a two-metre-long cable, for creative executions on high ceilings.

## On track, on cable

Our beloved Smart 48 Tubed track and track-suspended can be combined with a 48V track adapter on the Pista rail. Choose between Smart 48 and Smart 48+, and any of 3 light options: Cake, Kup or Lotis. Minude joins the party with its rich anodised colours. As a single 48V track spot or a twin lamp unit with phenomenal yogic flexibility, or as a suspended track spot, adding grace and dimension to your expression. Finally, Marbul and Placebo for Pista enter the scene. With their bigger volume and decorative touch, they enhance the presence of our slender 48V track system.

*With a name derived from the Latin word for “ruler”, the Rektor range of LED lighting has every quality of a leader. Winner of the 2014 Henry Van de Velde design award, Rektor showcases the distinguished effects of right angles, accented light direction and no visible wires.*

## Hidden ingenuity

The unique feature of Rektor is that all the technical workings are concealed within the fixture. The innovative tilting technology allows you to rotate the LED head through 360°, as well as adjusting it upwards or downwards through 90°. All without a single wire being visible.

## Rektor in many applications

Rektor comes available surface-mounted with a sleek driver box, or recessed, hiding the driver box completely in the ceiling or wall. Rektor’s refined industrial, rectangular design is also an option for our 230V track system, making it an even more attractive and relevant choice for retail and hospitality spaces.

VAEDER SUSPENSION - DONKEY GREY STRUC-WHITE

# VAEDER

Design — Gerd Couckhuys

*With a name derived from the English verb ‘to evade’, it is clear from the start that Vaeder will be miles ahead of anything average. This fixture feels equally at home in an energy-efficient, ergonomic office environment and in a home office. Its characteristic honeycomb structure in combination with a wafer-thin diffuser minimizes glare, whilst Vaeder’s ground-breaking LED technology results in an energy-efficient and high-performance office fixture.*

## Otherwordly

Vaeder can be supplied either surface-mounted or as a pendant. For surface mounting, it is positioned a small distance from the ceiling, which gives it a lighter look, as if floating against the ceiling. In its pendant version, Vaeder’s soft curves create a futuristic fixture that appears to be hovering out of another dimension. The fixture’s suspension height can be modified using a new adjuster system.

## UGR16

Because of its unique design consisting of one LED source and three optical components, this luminaire provides bright and glare-free light with an optimal UGR value of 16. This makes Vaeder a perfect LED alternative to office luminaires with the traditional fluorescent T5/T8 lamps.

COMO CORNER  
PRIVATE RESIDENCE, AMSTERDAM (NL)

# COMO CORNER

Design — Dirk Wynants

*Especially conceived for renovation projects and a vibrant desire to keep installation simple, Como Corner bears no resemblance to anything in our profile families. Designer Dirk Wynants created this linear lighting solution with soft, indirect light, and an extremely subtle expression, with the purpose of confirming that challenging spaces can have beautiful light too.*

## So simple, so easy

This surface-mounted linear lighting solution poses no challenge to install on the wall or ceiling, where electrical outlets are limited, and where ceiling height is within easy reach. A simple aluminium extrusion fixed to the surface, 1 or 2 quality LED strips and a cover, custom-cut up to a maximum length of 4 meters.

## Corners of light

Como Corner can emit light from 1 or 2 sides. Place it horizontally between the ceiling and wall, and it offers the options of indirect light on the ceiling, a wall-wash effect, or both. Or try it again horizontally, but at any level, to show up and/or down light. Position Como Corner vertically in the corner, where two walls meet, for a lighted corner space.

## Welcome visual comfort

Our connected-ready profile is a new development in visual comfort. Its integrated Casambi module makes Como Corner's light a contributor to a person's well-being. Light levels to match time of day, light uniformity and indirect light (thus no glare), all contribute to Como Corner's inevitable popularity.

# DRUPL

*Inspired by the effects of sunlight through droplets of water, Modular's Drupl portfolio is named after the Dutch word for 'drop'. New advances in luminary technology make Drupl the perfect continuous lighting solution for offices, where high-quality light and anti-glare qualities are key to comfort and productivity.*

## Cutting-edge optical lighting

Drupl combines the benefits of unique optical lenses over highly-performant LEDs producing light at a quality of CRI90 or greater with elegant design that will transform any professional space. Available in a wide range of colours and shapes. Drupl's flange guarantees an attractive, streamlined and advanced recessed install.

## 2700K colour option added

So that you can bring the most beautiful, natural and highest quality light into your space, Modular has upgraded the technology of many of our prominent linear lighting solutions. Fortimo LED Lines now come in 3 colour temperatures (2700K, 3000K and 4000K), and each colour option comes with a standard light quality of CRI90+.

## Illumination that thinks for you

Using a DALI-based lighting control system, Modular now offers smart profile lighting solutions that incorporate 3 types of miniature sensors: motion, daylight and infrared. By integrating sensors, our profiles are programmed to regulate light levels based on ambient light, time of day and/or presence in rooms. The result is maximum comfort, and energy savings of up to 75%.

\*output for white struc, 3000K, 25° (if applicable)

A member of our popular SLD family, SLD50 is a thin, attractive (50mm wide) variant. To complement its linear light, designers can incorporate Modular's Eyeball, a small yet highly powerful, adjustable spot that can be rotated 360° and adjusted 25° in both directions. Its sleek design and luscious colours, champagne, gold, bronze and silver bronze, make SLD50 a perfect solution for offices, as well as for private homes and hospitality environments. The SLD50 family offers two solutions to execute human centric lighting (HCL) concepts: tunable white and high intensity LEDs (3600 lumens).

## The newest member of our gang

With the SLD50 naked you can think up your own configuration: with different outer and inner profiles in different colour combinations, 4 possible mountings, the naked linear LED tubes that come in 3 different lengths and the option to add accent lights, in the form of our naked eyeball luminaires. The warm colour options for the inner profiles (gold and champagne) make sure these luminaires are ideal to be used in domestic or hospitality settings.

## Always aim high

If more powerful light combined with the same brilliant esthetics of SLD50 naked is your desire, SLD50 high fulfills it. Perfect for a space in which users require an extra degree of visual comfort. Its deep recessed light units provide powerful luminance, the perfect fit for an office looking to add architectural feel to its ambiance. Available in SLD50 colours, trimless, in a surface mounted, suspended and recessed version, and with flange, for the recessed version only.

*Light lines are a beautiful way to highlight the architectural elements of a space. SLD35, formerly SL micro, can easily be your luminaire of choice for this effect. In fact, so can our entire SLD family. Available in ceiling mounted, suspended and recessed versions. SLD35's IP44 version enables you to extend your light lines into an outdoor space or the bathroom.*

## Colours to impress

SLD35's frame is the second thinnest of the family. Let it make an impression with its anodised colour finishes. Champagne, bronze and silver bronze will make hospitality and residential spaces look absolutely stunning.

DENT SMALL

DENT MEDIUM

# DENT

Design — Jeffrey Huyghe

*This is the luminaire with a playful personality. Looking one way, and then another. Its design is enigmatic, as is the light it provides. And then there's what can be done with it, and where. Alone on a residential wall, it's minimalist and beautiful. Together in a large public space, they become an artful lightscape with puzzling lines and angular paths.*

## A twofold design, one art installation

Dent is an excellent candidate for an art installation that demands minimalist beauty, originality and function. One, two, or even several units of different shapes and colours can be combined in wildly playful patterns and landscapes that enhance the mathematical cleverness and playfulness of the design.

## Endless applications, endless play

Dent is an ultra-thin (25mm) wall fixture that fits in a number of residential and hospitality environments. Narrow hallways, large spaces, cozy spaces, walls of any dimension. Our minimalist fixture with an edge is ready to play.

## Playful modularity for more than light

Dent comes in three sizes. Small comes as a square, medium and large are rectangular. Create mind-boggling artistic landscapes with this geometrical design. Squares, rectangles, bigger rectangles, lines. As the name suggests, Dent's body is slightly indented, adding to the depth of any configuration.

# SULFER

*Sulfer is a minimalist square-shaped fixture. The cast aluminium luminaire brings a modern accent to walls, whether in- or outside (IP54) homes, hotels, restaurants, etc. By default, Sulfer diffuses a wide beam (flood), yet the fixture comes optionally with additional beam angle plates (medium and small) to let you customize the beam. Since the diffuser is recessed into the casing, Sulfer shines indirect light, ensuring you will never be blinded by its beam.*

# SULFER UPLIGHT

*A member of our minimalist Sulfer family, Sulfer uplight brings you the indirect uplight you've been waiting for. A wall-mounted luminaire, Sulfer uplight is installed perpendicular to the wall. Its powerful LED provides a generous, indirect flood beam upward and reflects off the wall, as well as off the ceiling, offering a secondary, softer and wider light beam.*

## Minimalist & sophisticated

Choose Sulfer uplight for an expression requiring a minimalist wall-mounted uplight that also provides choices in lumen packages, dimming or smart lighting solutions with Casambi-ready gear. A pure geometrical shape, Sulfer uplight, like its other family member Sulfer, encompasses the accessibility of a passe-partout luminaire.

## Uniform, ambient light

In large spaces Sulfer uplight brings the benefits of a powerful but indirect LED light, without the discomfort of glare. Try it in offices, in combination with a linear lighting, and create uniform light levels for more visual comfort. Alternatively, experiment in hospitality, where you'd like a soft ambient light around you, by dimming down Sulfer uplight.

# TRAPZ

*With their indirect lighting and subtle shadow effects, wall fixtures are undoubtedly atmosphere creators. Trapz, our organic interpretation inspired by a trapezium, is no different. The flattened cylinder has been finished with two oblique openings, which allow you to see the contrasting interior of the luminaire and immediately create an unusual chiaroscuro effect.*

## Rich colours in many places

A list of high-end spaces can benefit from our Trapz, thanks to a refined, angular design and the warm mood that its anodised colours can create. On the outside, you'll enjoy extra choices of anodised black, bronze, silver bronze and champagne, while the inside is available in black, champagne and aluminium. Try matching Trapz with Duell, Nude on the wall, and Minude, Thimble, Shellby and Placebo.

# DUELL wall

*With its gentle curves, Duell gives every room a softer touch. As a wall luminaire, Duell creates a wide fan of light on the wall, both upwards and downwards. The double-walled housing allows you to play with colour, bringing a more authentic feel into the room.*

## **Anodised colours and splendid light effect.**

Duell will never go unnoticed, in fact, make it more visible with a flavourful range of anodised colours. On the outside, you'll enjoy extra choices of anodised black, bronze, silver bronze and champagne, while the inside is available in black, champagne and aluminium. In any of its colour choices, Duell will effortlessly give an architectural, high-end touch to your expression.

colours	<i>black structure-gold white structure-champagne anodized black-black anodized black-champagne anodized black-alu anodized bronze-black anodized bronze-champagne anodized bronze-alu anodized silver bronze-black anodized silver bronze-champagne anodized champagne-black anodized champagne-champagne</i>
output*	775lm – 14W
cct	2700K
cri	90+
dimming	<i>trailing edge, 1-10V, pushdim (GI), dali</i>
