Construction Lamp Floor

JOOST VAN BLEISWIJK, 2012

The Construction lamp ultimately originates from a bright curiosity combined with expert skills, industrial tools and a touch of playful passion for vintage construction toys. As a result, the lamp's details and joints take the shape of Victorian cast iron components and become part of a base that resembles a traditional electricity pole. Enjoy a high voltage stream of inventiveness and light!

Farooo

MARCEL WANDERS, 2012

The name Farooo is inspired by the Italian word for a lighthouse and its intense beam of light, which acts as guidance for ships around dangerous coastlines. Characterized by a sinuous, ornamental body & a contemporary shade, this lamp comes in three imposing dimensions & a choice of several stylish colours. Let yourself be led to safety with Farooo's light beam, and float happily towards its soft, placid glow.

Filigree Floor Lamp

RICK TEGELAAR, 2016

"What distinguishes a lamp from a light source?" is the question that initially triggered Rick Tegelaar to imagine and create the Filigree Floorlamp. Thanks to an elegant and dainty network of fine wires, that reminds us of delicate filigree jewelry, the translucent screen protecting the powerful LED light at the heart of the lamp is held under tension, distributing a soft light glow evenly across the room. When pointed towards a wall or ceiling, with the ornamental filigree flower structure facing us, the lamp projects a playful network of shadows to mesmerize and entertain.

Raimond II Tensegrity

RAIMOND PUTS, 2014

The Raimond Tensegrity is a floor lamp made from elegant metal, complemented with the sturdy earthiness of wood.

Tensegrity is a term that was first described by Buckminster Fuller as an architectural term. It refers to the interconnected wooden structure that uses tension and pressure to keep its shape. The beauty of the Raimond Tensegrity lies not only in its contrasting materials, but also in the trigonometric harmony of both structures. Mathematical perfection times two.

Statistocrat Floor Lamp

ATELIER VAN LIESHOUT, 2014

The floor lamp's lean aluminium body is really multifunctional with its towering two meters and all-embracing light beams, the tallest shade projecting light towards the ceiling while the wider shade acts as the perfect reading lamp. And what about the two other shades? The lowest is no shade ... but a surprisingly useful side table. Perfect to support a laptop or your favorite drink, it's always in the spotlight!

Coppélia Suspended

ARIHIRO MIYAKE, 2015

Coppélia comes to life in a whirl of flowing motion and sparkling light. With a graceful sense of wonder, a beautiful mechanical doll appears to magically come to life in the famous ballet Coppélia. In the performance the ballerina traces, with sinuous movements, a delicate after-image in the air, which inspires the fluid motion in the design of Miyake's Coppélia Suspended Lamp. The graceful dance, staged by the three-dimensionally crossed wire structure, leads the spectator to dozens of glowing LED lights, which define the contour and the magical glow of Miyake's interpretation of a classic chandelier.

Emperor Suspended

NERI AND HU, 2009

Flock of Light

STUDIO TOER, 2020

Flock of Light by Studio Toer tells the story of nature with lights inspired by the movement of fireflies. Gravity Chandelier

PAUL COCKSEGE, 2021

The Gravity Chandelier by Paul Cocksedg re-imagines the chandeliers of the past. Inspired by changing rigidity to elasticity. The Gravity Chandelier is the definition of a modern chandelier. At first glance, it doesn't reveal its flexibility and cleverness; It takes a second look to unravel its mystery. With its flexible arms, you define the chandelier's diameter and choose where the light travels, but the suspended elements create natural curves shaped by gravity.

The Gravity Chandelier comes in two sizes, after the number of arms, Gravity Chandelier 5 and Gravity Chandelier 7.

Lolita suspended

NIKA ZUPANC, 2008

"Who is afraid of pink? My imagination chases female archetypes intentionally. Frivolous, even naive objects are my favorite victims. And when, during such a process, I manage to be creative in an evidently reserved way, I then touch the purest meaning of my work and frivolity becomes timeless elegance."

Luminora Light

CRISTINA CELESTINO , 2024

Inspired by the grandeur of Murano glass and mathematical elegance of the golden ratio, Luminora Light merges craftsmanship with modernity. Its floating design embodies simplicity and complexity, creating a luminous sculpture where the structure is light itself. The V-shaped diamond optical pattern and transparent LED tubes produce a mesmerising effect.

Meshmatics

RICK TEGELAAR, 2017

Whoever sets eyes on the Meshmatics Chandelier will never guess what hides behind its sophisticated appearance. Rick Tegelaar elevated the nature of humble wire netting by developing a machine and a set of tools to model it with accuracy. The full potential of this thin and flexible material is stretched and captured within three layers of beauty.

NR2

BERTJAN POT, 2015

NR2 by Bertjan Pot is an elegant and bright bubble of white or black thread. The lattice pattern creates a fine web that shines and glimmers in the light. The fine web is oval-shaped and bears the signature style of Bertjan Pot; designs created from an experiment with different materials. The integrated LED lamp in NR2 subtly diffuses a soft and magical glow around the room. NR2 is available in two different colours and sizes.

NomNom Light

ODIN VISSER, 2022

Can. Not. Resist! The NomNom Light by Odin Visser is a contemporary lighting design that puts a smile on your face and a tingle in your belly. This modestly sized suspension light is the perfect example of the art of omission, while remaining distinctive. Two straight lines and a sphere that create the illusion of two chopsticks holding something delicious. As a stand-alone, there's no way around NomNom's playful elegance, but when multiplied in a bundle or in a row, it's simply irresistible. The NomNom Light makes us hungry for more! And with six colours to choose from, there's always a new flavour to try out.

Prop Light Suspended

BERTJAN POT, 2013

"We have round lights, we have straight lights. We have them with lights on one side, we have them with lights on two sides. You can hang them high, low, horizontally, vertically or even hang them in an angle. Put them on the floor, hang them on your wall or down from the ceiling. We find it very hard to imagine an interior where this prop is not in place" - Bertjan Pot

Raimond II

RAIMOND PUTS, 2009

The Raimond lights: perfect spheres of mathematical ingredients punctuated by tiny LED lights. It's no coincidence that the dimension of all Raimond lights resemble a prime number. The result of mathematical perfection, that brings the starry night sky into your home.

Raimond II Dome

RAIMOND PUTS, 2013

The Raimond Dome is made of the same mathematical ingredients as its spherical family members. Also punctuated by tiny LED lights but amplified with a powerful light source in its centre. Looking at the Raimond Dome feels like staring into the soft glow of a starry night, making it the perfect light for dining under the stars. Designer Raimond Puts passed away before he could see the final design. Together with Raimond's wife, artist & designer Tis Ernst, Moooi completed the Raimond Dome.

Lolita Table Lamp

NIKA ZUPANC, 2008

Who is afraid of pink? My imagination chases female archetypes intentionally. Frivolous, even naive objects are my favorite victims. Charleston Sofa

MARCEL WANDERS, 2016

The beauty of iconic pieces needs to be turned around, played with, and challenged in innovative ways to reach new levels of inventiveness and seduction! Charleston by Marcel Wanders is a classic sofa, elegant and comfortable, dressed in stylish brown leather with embroidered accents, that has been shifted into a vertical posture. Its grace becomes slender and elongated, tall and majestic, while it plays with our mindset and expectations. The traditional armrest becomes a very comfortable seat for one or two people. Certainly an eye catcher, Charleston is also a cozy companion that literally turns the corner to open a new world of possibilities!

ATELIER VAN LIESHOUT, 2018

Sculptor Joep van Lieshout set himself a goal: to create one chair per day for a month. He named the project Prototypes as part of his utopian project New Tribal Labyrinth. This futuristic vision focuses on the reinvention of the industrial revolution by recreating an ideal world based on the lost relationship between individuals and raw materials.

The Golden Chair

NIKA ZUPANC, 2013

Under a mysterious magic spell, a retro-looking school chair is dipped in enchanted golden nectar, which washes away its austerity and crowns it with a shiny aureole. Isn't this a typical school-time wish, while looking out of the window and hoping for a fairytale to begin? The Golden Chair got a black framed sister in 2018, and both can be dressed in a selection of fabrics to match different interiors.

Liberty Table

ATELIER VAN LIESHOUT, 2018

The Liberty table, designed by Atelier Van Lieshout, is a typical example of artwork turned into a design object, just like the earlier released Liberty Lounger. With the Liberty Table, Atelier Van Lieshout continues to address the New Tribal Labyrinth and “Arts and Crafts” movement with traditional craftsmanship and using simple forms.
