Verner Panton

(1926 -1998)

Among the giants of Danish design, Verner Panton established a unique reputation for his exuberant originality and tireless experimentation. Panton created lamps, furniture and textiles – and was also a sought-after interior designer. Although he was at the forefront of mid-century Danish Modern, Panton’s contribution was anything but mainstream. He enthusiastically embraced new materials, he splashed with a bold colour palette, and he playfully imbued many of his sculptural creations with a strong graphical expression – without ever compromising on quality or workmanship.

Panton’s iconic designs have emerged as contemporary design classics – as strikingly inventive now as they were 50 years ago.

Panton’s interior installations have attained legendary status. The most famous examples are the ‘Visiona’ ship installations for the Cologne Furniture Fair (1968 and 1970), the Spiegel publishing headquarters in Hamburg (1969) and the Varna restaurant in Aarhus (1971).

Verner Panton in his own words:

“The main purpose of my work is to provoke people into using their imagination. Most people spend their lives living in dreary, grey-beige conformity, mortally afraid of using colours. By experimenting with lighting, colours, textiles and furniture and utilizing the latest technologies, I try to show new ways, to encourage people to use their imagination and make their surroundings more exciting”.

Pendants.

The background is a blurred photograph of a jewelry store. It shows various pieces of jewelry, including necklaces and pendants, displayed on stands. The lighting is warm and focused on the items, creating a bokeh effect in the background. The overall aesthetic is clean and modern.

icon.

Only few designs stand the test of time and become true icons. The VP Globe by Verner Panton is one of them. Designed in 1969 - the acrylic globe with its system of reflectors, that diffuse the light and eliminate glare - is a perfect example of Panton's unique understanding of shape, light and colour and his bold approach to combining different materials.

As one of Verner Panton's most enduring creations - the VP Globe is recognized worldwide for its sculptural and futuristic form.

In close partnership with the Panton estate, VERPAN has continued the development of the VP Globe and introduced new iterations with unique individual qualities.

masterpiece.

Regarded as one of Verner Panton's greatest masterpieces within lighting design, the Fun collection was born from Panton's desire to create a lamp that would function both as a light source and an interior sculpture.

Fun in brass finish builds on the existing Fun collection. The brass finishing adds a warm glow, which in combination with the natural seashells create a beautiful and elegant design that perfectly reflects and spread light in interesting, diffuse cascades.

CUSTOM INSTALLATION

“After years of effort, the Basler Kunstverein has succeeded in restoring and installing in the former “Weinstube” of the Restaurant Kunsthalle the unique shell ceiling lamp designed by Verner Panton (1926-1998), the world-renowned architect and designer, Basel-resident and regular guest of the restaurant. This one of a kind design object, comprised of thousands of individually cut translucent shell pieces, was designed by Panton in 1972 for his house in Binningen/Basel and further developed by him until 1987. It is accessible for the first time in more than 30 years and now graces a room that highlights its elegance and singularity” /Kunsthalle Basel

About.

Verpan

est. 2003

Verpan is - much like Verner Panton - a product of the Danish design tradition, which have put Denmark on the world map for functional, modern and unique design.

In close collaboration with the Panton estate - especially widow Marianne Panton - Verpan has acquired the production and sales rights to a significant part of Verner Panton's designs. In 2003, the production of lighting was initiated and in 2010 a furniture range was added. A continuous process of picking and choosing products from the vast treasure chest of Panton's work, will bring many more items to life again.

All of the Verpan products stand out as some of the most elegant and memorable of Verner Panton's designs.

Products that create life, sound, movement, colour and light - design that brings value into the visual world around us.
