

ZERO[®]

HIGH-LIGHTS 2023

UNIQUE ATTRACTION

Zero Interiör was founded in 1978 with the vision of making unique light fixtures for a design-interested audience. These products, in combination with a deep understanding of how best to illuminate public indoor and outdoor environments, is at the heart of our identity. From the start, our creation of unique environments has been praised in both Sweden and abroad, thanks to our guiding principles: quality, environmental care And innovation. Our local roots and manufacturing have built long-term relationships with customers and suppliers that are vital to us. More than 80% of manufacturing takes place within roughly 200 km of Nybro in Småland and all assembly occurs in our workshop in Nybro.

LUMO WIRE

This year's extension of the Lumo family is a catenary pendant and a wall fixture.

Both are IP65 rated for outdoor installations. This offer a larger range of options for indoor and outdoor installations.

Lumo is a classical, cone-shaped fixture, cast from a single piece of aluminium.

The six-millimetre-thick shade ends elegantly with a nice full radius. The diffuser is imperceptibly mounted into the shade in a way that avoids glare.

Design Thomas Bernstrand 2023

SPRINKLE BOLLARD

We are excited to announce the expansion of our popular Sprinkle lighting collection with the introduction of a floor lamp, a linear pendant and an outdoor bollard. All pieces feature the same striking geometric silhouette as the original pendant, offering unexpected and distinct design elements that add sophistication to any space. The Sprinkle family now offers a range of lighting options for any space, all at a price point that allows for incorporation into any larger design scheme. We can't wait to see how they are incorporated into the creative spaces of architects and designers everywhere.

COMPOSE TABLE

This year's newcomers to the Compose family are floor & table lamps, wall fixture and a larger version of the metal shade. These complete the Compose family and offer a large range of options. Compose is renowned for its multitude of expressions, thanks to its versatile options. The aim is to offer a fixture that is more like a tool, or an instrument, from which the most beautiful music can be composed.

Let's Compose!
